

Exemplar Canadian Focus Portfolio

Annual Management Report of Fund Performance

EXEMPLAR CANADIAN FOCUS PORTFOLIO ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the year ended December 31, 2013

This annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements for Exemplar Canadian Focus Portfolio (the "Portfolio"). If you have not received a copy of the annual financial statements with the Management Report of Fund Performance, you may obtain a copy of the annual financial statements, at no cost, by calling 877.327.6048, by writing to us at BluMont Capital Corporation, 36 Toronto Street, Suite 750, Toronto, Ontario, M5C 2C5 or by visiting our website at www.blumontcapital.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Portfolio's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Portfolio.

Forward-Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Portfolio. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Portfolio believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward-looking information is not exhaustive, and reference should be made to the other risks discussed in the Portfolio's filings with Canadian securities regulatory authorities. The forward looking information is given as of the date of this Management Report of Fund Performance, and the Portfolio undertakes no obligation to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion on Fund Performance

Investment Objective and Strategies

The investment objective of the Exemplar Canadian Focus Portfolio is to achieve superior capital appreciation over both short and long-term horizons primarily through the selection and management of a concentrated group of long and short positions in Canadian equity securities and equity derivative securities.

The Portfolio invests predominantly in large and mid capitalization companies. The Portfolio may also invest in bonds and other debt instruments if warranted by financial conditions. The Portfolio does not specialize in any one industry other than to concentrate investments in those industries that offer the best opportunities for exceptional returns at each stage of the economic and market cycle. The Portfolio may also invest in options, including put options or call options either in respect of a specific security or in respect of a stock exchange index as a means to reduce volatility.

The Portfolio engages in short selling of securities which the portfolio manager believes are overvalued, especially securities of issuers with deteriorating fundamentals and weak balance sheets. Short positions of index securities such as exchange traded funds may also be employed for capital preservation and hedging purposes. Short positions in total may not exceed 40% of the Net Asset Value of the Portfolio. The Portfolio may hold cash or invest in short-term securities for the purpose of preserving capital and/or maintaining liquidity, based upon the portfolio manager's ongoing evaluation of current and anticipated economic and market conditions. The Portfolio may also invest in foreign securities of the same type and characteristics as described above. The Portfolio may invest in derivatives for hedging and non-hedging purposes as permitted by applicable securities laws. The Portfolio may enter into securities lending, repurchase and reverse repurchase transactions to generate additional income or as a short-term cash management tool.

Investment Risk

The risks of investing in the Portfolio remain as stated in the Portfolio's prospectus dated April 29, 2013 (please see "Risk Factors" pages 25 – 31). The principal risks associated with the Portfolio are stock market risk, specific issuer risk, short selling risk, foreign security risk, currency risk and liquidity risk.

The Portfolio is suitable for clients seeking medium to long-term growth (through capital appreciation) who have a moderate risk tolerance level.

Results of Operations

For the year ended December 31, 2013, Series A Shares of the Portfolio gained 24.1% while the Canadian benchmark, the S&P/TSX Total Return Index, posted a gain of 13.0% for the same period. Please refer to the Past Performance section for the performance of the other Series. The performance of the other Series offered by the Portfolio differs from Series A largely because of varying levels of expenses charged to each series, as explained in the Management Fee section.

As of December 31, 2013, 80.4% of the Portfolio's net assets (where short positions are netted against long positions in each category) were invested in Canadian equities, 7.8% in U.S. equities, 2.3% in global equities and 9.5% in cash equivalent instruments.

Canadian equity markets performed poorly in 2013 relative to their global peers. Laden with resource stocks and thus viewed to be an indirect play on slowing emerging economies, they were shunned by global investors most of the year. Chinese economic growth continued to falter as new leadership pursued policies aimed at reforming the financial system while transitioning the economy to a more sustainable model focused on domestic consumption rather than prior reliance on exports. Even though China's 7.6% GDP growth was the slowest in 14 years, economists expect further deceleration in 2014.

We correctly identified this trend early in the year, avoiding exposure to the underperforming resource sectors, while focusing on stocks from sectors such as Industrials, Consumer Discretionary, Health Care and Information Technology. Despite the relatively poor performance by the S&P/TSX Index, these sectors had robust returns in the mid to high 30% – in fact very similar to their US counterparts.

We pursued a thematic approach to stock selection, which helped us achieve attractive portfolio returns. In an environment of slow global growth, extended low interest rates and differentiated valuations, well managed and well financed companies share an unprecedented opportunity to enhance their growth by pursuing strategic and accretive acquisitions – frequently leading them beyond their operating borders. This consolidation strategy can ultimately propel suitors into global players by facilitating international expansion. Canadian investors have embraced this strategy especially toward the latter part of the year, when it became apparent that the Canadian currency reached its peak for this cycle and the domestic economy began lagging the US for the first time since the financial crisis. The acquisition pace should remain robust as corporations anticipate the end of the Federal Reserve stimulus and the inevitability of higher interest rates.

Canadian investors have benefitted from the globalization trend as Canadian companies such as Alimentation Couche-Tard made its first meaningful foray outside North America by purchasing Statoil's European subsidiary, CGI stepped up its acquisition size by taking on UK based Logica, and Valeant continued its international pursuits.

Many of the Portfolio's top performing companies in 2013 achieved a high level of sustained growth by pursuing accretive acquisitions, resulting in well rewarded stock appreciation: Valeant appreciated by 97%, Auto Canada by 162% and DHX Media by a remarkable 205%. Boyd was one of the Portfolio's top contributors for the second year in a row, having appreciated 95% this year on top of last year's 48% gain.

The most important strategy change made by Portfolio in 2013 was driven by the Federal Reserve tapering announcement. Even though Mr. Bernanke took pains to separate the tapering process from rising rates, markets got the message that the current low interest rate environment will not last forever. The transition from interest sensitive investments to economically sensitive ones has begun around the globe. Even though signs of an improving environment in Europe and US will be periodically disrupted by problems in the emerging world, global recovery will most likely grind on. The inevitability of rising rates has left investors few alternatives to equities. It is true that valuations have risen meaningfully in the course of last year, but the driver to higher equity markets will be asset out-flow from over-owned fixed income instruments into equities, which are the most likely beneficiaries of economic progress, however uneven it might prove.

Recent Developments

On December 2, 2013, Arrow Capital Management Inc. ("Arrow") acquired all the outstanding shares of BluMont Capital Corporation ("BluMont Capital" or the "Manager"), resulting in a change of control of BluMont Capital. As Arrow intends to amalgamate with BluMont Capital on or about April 1, 2014, continuing under the name "Arrow Capital Management Inc.", at a special meeting of shareholders on November 27, 2013, the shareholders of the Portfolio approved a change of manager.

On June 12, 2013, Series R Shares of the Portfolio were exchanged for Series A Shares. The elimination of Series R Shares allowed for increased economies of scale for operating expenses and eliminated the administrative and regulatory costs of operating two separate series that are essentially identical. The Series A Shares and Series R Shares are identical in terms of investment returns, management fees and operating expense rates and the switch occurred on a tax deferred basis.

Related Party Transactions

On April 24, 2008, BluMont Capital seeded the Portfolio with capital of \$5,000 in Series A Shares and \$45,000 in Series F Shares. As of December 31, 2013, BluMont Capital held 529 Series A Shares and 4,768 Series F Shares of the Portfolio.

Management Fees

BluMont Capital receives a monthly management fee (the "Management Fee"), calculated as a percentage of the Portfolio's net asset value and is accrued daily and payable monthly. The Management Fee rate applicable to the Portfolio is 1.65% per annum in respect of Series A Shares, 1.95% per annum in respect of Series L Shares and 0.65% per annum in respect of Series F Shares. Shareholders of Series I Shares of the Portfolio pay a negotiated management fee. For the year ended December 31, 2013, the total Management Fee equaled \$1,066,847 (2012 – \$1,076,767). The management fee is

paid in consideration of investment management and administration services. No breakdown of such services was specified in the Management Agreement dated January 6, 2012. From this Management Fee, the Manager pays fees to the investment advisor (BluMont Capital, in its capacity as such) who provides portfolio management services to the Portfolio. A portion of the Management Fee paid by the Portfolio is for trailer fees paid to dealers whose clients hold Shares of the Portfolio. The trailer fees are a percentage of the net asset value of the Portfolio, calculated and payable monthly. The table below outlines the Portfolio's annual Management Fees and trailer fees.

	Series A Shares	Series R [†] Shares	Series F Shares	Series L Shares	Series I Shares
Management Fees <i>(Annual Rate %)</i>	1.65%	1.65%	0.65%	1.95%	Negotiable
Trailer Fees <i>(rate as % of Management Fees)</i>	44.4%	1.7%	-%	0.6%	-%

† Series R was terminated on June 12, 2013

In addition, the Portfolio pays BluMont Capital performance fees ("Performance Fees") equal to 20% of the amount by which the Portfolio return in a year is in excess of the high water mark (the "High Water Mark"), and no Performance Fee is payable unless a hurdle rate of 6% is achieved in that year. Performance Fees will be payable in all circumstances where the performance of the Portfolio exceeds that of its High Water Mark and its hurdle rate. Please refer to the Portfolio's long form prospectus dated April 29, 2013, for further details relating to Performance Fees. The High Water Mark set as of January 1, 2013 was \$14.6959 for Series A Shares, \$15.0688 for Series F Shares and \$10.2327 for Series L Shares. For the year ended December 31, 2013, the Portfolio accrued \$3,445,751 (2012 - \$25,966) in Performance Fees. Performance Fees are calculated and accrued daily such that, to the extent possible, the share price each day will reflect any Performance Fees payable as at the end of such day. Performance Fees for the Portfolio will be calculated and accrued each day, but will only be payable following the end of the fiscal year of the Portfolio based on the actual annual performance of the Portfolio.

The Manager incurs operating expenses on behalf of the Portfolio and charges these expenses to the Portfolio. For the year ended December 31, 2013, the Manager has, in its discretion agreed to absorb \$70,026 (2012 - \$85,855) of operating expenses associated with the Portfolio.

Financial Highlights

The following tables show selected key financial information about the Portfolio and are intended to help the reader understand the Portfolio's historical financial performance for the past five years. This information is derived from the Portfolio's financial statements, and is represented net of expenses which have been charged to the Portfolio.

SERIES A - NET ASSETS PER SHARE

For the years ended December 31,

	2013	2012	2011	2010	2009
Net Assets, beginning of year¹	\$ 14.08	\$ 13.50	\$ 14.66	\$ 12.05	\$ 10.50
Increase from operations:

Trading expense ratio ⁶	0.08%	0.10%*

[†]Series L commenced operations on February 1, 2012.

*Ratios have been annualized.

1. The net assets per share are referenced to Net Assets in accordance with Canadian generally accepted accounting principles ("GAAP") and are derived from the Portfolio's financial statements. The Net Assets presented in the financial statements may differ from the Net Asset Value ("NAV") calculated for Portfolio pricing purposes. NAV is calculated using fair value measures as defined by National Instrument 81-106 ("NI 81-106") whereas, Net Assets are calculated in accordance with Canadian GAAP. An explanation of these differences can be found in the notes to the financial statements. Net Assets are based on the actual number of shares outstanding at the relevant time. The increase from operations is based on the weighted average number of shares outstanding over the financial year. This table is not intended to be a reconciliation of beginning to ending Net Assets per share.
2. Distributions were reinvested in additional shares of the Portfolio.
3. Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year. The management expense ratio is calculated in accordance with Part 15 of NI 81-106 and therefore includes performance fees, which were previously reported separately as dollar amounts.
4. The Manager has absorbed certain expenses or waived certain fees otherwise payable by the Portfolio. The amount of expenses absorbed or waived is determined annually at the discretion of the Manager and the Manager can terminate the absorption or waiver at any time.
5. The portfolio turnover rate can indicate how actively the Investment Advisor manages the portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Portfolio buying and selling all of its securities in its portfolio once in the course of the year. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Portfolio in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Portfolio.
6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
7. Ratios and supplemental data, where applicable, are computed using the net asset value of the Portfolio.

Past Performance

The performance information shown below assumes that all distributions, if any, made by the Portfolio in the periods shown were reinvested in additional shares of the Portfolio. If you hold the Portfolio outside a registered plan, you will be taxed on distributions. Distributions of income the Portfolio earns and capital gains it realizes are taxable in the year received whether received in cash or reinvested in additional shares. No adjustment for potential tax consequences to an investor has been made to the performance information.

The indicated rates of return are historical annual compounded total returns including changes in share value and do not take into account sale, redemption, distribution or other optional charges, that, if applicable, would have reduced returns

or performance. An investment in the Portfolio is not guaranteed. Its value changes frequently and how the Portfolio has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates the Portfolio's annual performance for each of the year(s) shown, and indicates how the Portfolio's performance has changed from year to year. It shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of the financial year.

† Series R terminated on June 12, 2013

Annual Compound Returns (Compound Performance)

The following table shows the annual compound total returns of the Portfolio, and for the S&P/TSX Total Return Index Value ("S&P/TSX TRIV") (a price weighted index of 300 of the largest, most widely-held stocks traded on the Toronto Stock Exchange) for the periods shown ended December 31, 2013 for Series A, Series F and Series L. Returns for Series R are for the period ended May 31, 2013. The Relative Performance returns show the performance of the Portfolio as compared to the benchmark S&P/TSX TRIV.

	1 Month	3 Months	6 Months	1 Year	3 Years	5 Years	Annualized Since Inception	Cumulative Total Return
Series A	1.7%	9.4%	14.2%	24.1%	7.2%	11.7%	11.2%	82.8%
Series F	1.8%	9.7%	14.9%	24.9%	8.2%	13.9%	12.2%	92.0%
Series L	1.7%	9.4%	14.3%	23.5%	n/a	n/a	12.9%	26.3%
Series R*	1.1%	2.6%	10.2%	15.9%	8.5%	n/a	8.6%	34.3%
S&P/TSX TRIV	2.0%	7.3%	14.0%	13.0%	3.4%	11.9%	1.6%	9.4%

*All Series R Shares were redeemed as of June 12, 2013 therefore the data above represents the highlights for the period from January 1 to May 31, 2013.
