

EXEMPLAR INVESTMENT GRADE FUND

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the year ended December 31, 2017

This annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements for Exemplar Investment Grade Fund (the "Fund"). If you have not received a copy of the annual financial statements with the Management Report of Fund Performance, you may obtain a copy of the annual financial statements, at no cost, by calling 877.327.6048, by writing to us at Arrow Capital Management Inc. (the "Manager" or "Arrow"), 36 Toronto Street, Suite 750, Toronto, Ontario M5C 2C5 or by visiting our website at www.arrow-capital.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Fund's annual financial reports, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

Forward-Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Fund. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Fund believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward-looking information is not exhaustive, and reference should be made to the other risks discussed in the Fund's filings with Canadian securities regulatory authorities. The forward looking information is given as of the date of this Management Report of Fund Performance, and the Fund undertakes no obligation to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion on Fund Performance

Investment Objective and Strategies

The investment objective of the Fund is to generate income and capital preservation by investing in a diversified portfolio of primarily North American investment grade corporate bonds.

To achieve the investment objectives the Fund will invest primarily in investment grade debt securities of Canadian corporate and government issuers that are rated BBB- or higher by a recognized rating agency. The Fund may also include non-investment grade debt securities and may invest in other asset classes if warranted by financial conditions.

In managing the Fund, East Coast Fund Management Inc. ("East Coast"), the investment advisor, will seek to generate income and preserve capital in each stage of the credit cycle; and seek to protect the Fund from interest rate risk associated with higher nominal interest rates and systemic risk. The sub-advisor will utilize the following investment process: (i) top-down analysis (macro-economic environment and sector); (ii) bottom-up analysis (company fundamentals); and (iii) quantitative analysis (asset class and security relative valuation). The outcome of this research will enable the sub-advisor to identify investment opportunities as well as ways of mitigating and avoiding undesirable market risk. The combination of all three investment processes will assist the sub-advisor in attempting to reduce the downside risk associated with an investment as much as possible prior to acquisition of the investment. The Fund will be well-diversified across industries to mitigate default risk and will deploy substantial hedging of interest rates, credit spreads and currency.

The Fund may use warrants and derivatives such as options, forwards, futures and swaps for hedging and non-hedging purposes. Such derivatives may be used to hedge against losses from changes in the prices of the Fund's investments and from exposure to interest rate changes, credit spreads and foreign currencies as well as market risk. Specifically, the Fund will use interest rate swaps and futures to hedge against interest rate changes. Derivatives may also be used to hedge general credit risk and/or to obtain exposure to individual securities and markets instead of buying securities directly. If used for non-hedging purposes, the derivatives acquired will be consistent with the investment objectives of the Fund and securities law. The Fund may also engage in short selling as permitted by securities regulations. Generally speaking, short selling can provide the Fund with opportunities for gains when markets are volatile or declining and also with opportunities to hedge specific risks including interest rate risk. While short selling will be used by the Fund as a complement to its primary investment strategy (discussed above), the sub-advisor will utilize the same fundamental analysis in determining whether securities of a particular issuer should be sold short.

Investment Risk

The risks of investing in the Fund remain as stated in the Fund's simplified prospectus. There were no material changes to the Fund over the year that affected the overall level of risk.

This Fund is suitable for investors who are able to accept a low degree of risk and are prepared to invest for the medium term.

Results of Operations

For the year ended December 31, 2017, Series F units of the Fund posted a gain of 3.9% (7.6% in 2016) while its benchmark, the FTSE TMX Canada Universe Bond Index, gained 2.5% for the same year (1.7% in 2016) for the same year. Please refer to the Past Performance section for the performance of the other Series. The performance of the other Series offered by the Fund differs from Series F largely because of varying levels of expenses charged to each series, as explained in the Management Fee section.

2017 was a very complex year as North American interest rates rose and global stock indices gained. Trade negotiations (NAFTA) and the U.S. tax cut dominated the headlines while commodities moved higher as increased expectations of inflation were priced into the market after years of quantitative easing by the world's major central banks.

What Went Well

The Fund benefitted from our highly efficient positioning along the credit curve. We were able to be structurally defensive while maintaining a consistently compelling yield. TRP Hybrids performed phenomenally well in the first half of the year and our positions in both U.S. Financials and U.S. Insurers produced solid gains throughout 2017. An excellent understanding of capital structure on behalf of our Portfolio Managers ensured that we succeeded when trading NVCC preferred shares.

What Did Not Go Well

Insulating our portfolio from downsized risks proved to be expensive this past year but we determined that it was worth it to keep volatility low as we maintained a focus on capital preservation. We missed out on much of the gains in high yield and instead upgraded the quality of our lines.

2017 Key Themes

2017 proved to be a pivotal year for the major central banks as, for the first time in years, global quantitative easing was reduced and North American interest rates were hiked. The Bank of Canada raised rates twice, more than doubling the 2yr yield and boosting the loonie by 5 cents. Canadian economic growth was solid and the unemployment rate reached its lowest point in over 40 years. The Federal Reserve hiked three times as equities surged to all-time highs and the most drastic changes to the tax code since the Reagan era were passed. Chair Yellen, in her final press conference, acknowledged that the one thing not achieved during her tenure was a return of inflation to the FOMC's target level of 2% (core PCE q/q SAAR). Other central banks (ECB and the BoJ) suggested that monetary policy would tighten gradually going forward as all major economies expanded for the first time in a decade. The BoE hiked as well after inflation jumped as a result of the devalued pound with Brexit issues being paramount.

Canadian corporate bond issuance reached a record of \$110 billion in sales in 2017, passing the previous high set in 2013. Hybrids and Maples were incredibly strong as the share of financials within the Canadian corporate debt space fell to 49%, the lowest level since 1999. Maple issuance was led by large U.S. firms including Disney, McDonald's and Apple. TransCanada and Enbridge both issued well-received hybrid notes that could be automatically converted into preferred shares in case of bankruptcy.

2018 Outlook and Expected Positioning

Traditional fixed-income is facing another year of headwinds as the markets expect both the BoC and the Fed to raise rates further in 2018. We positioned the portfolio with these rate increases in mind and we expect to meet our return goals in a higher interest rate environment.

The probability of a smooth return experience in 2018 is not that high. Asset class valuations range from above average to the most expensive they have ever been as we start off the year with:

- North American equity markets are at all-time highs
- Interest rates are near their low in yield and at the very beginning of a hiking cycle
- High Yield credit spreads are very expensive and at their cycle low in spread

Investment grade credit spreads are at their post-crisis lows and also appear quite expensive, however, they remain a lot cheaper than the levels they traded at pre-crisis. This does not mean that we are predicting a return to the historical lows in spread for investment grade credit but it is very possible that investment grade credit spreads continue to narrow as interest rates rise. Couple this with the fact that the total return generated by the defensively structured short dated bonds that we own would require about a 60 bps widening in credit spreads to negate the income earned and result in a negative performance. In summary we are quite happy to clip our coupon and capture the capital gain roll down on our short dated bonds as they are primarily high quality senior debt that we expect to behave quite well if the market gets skittish at some point this year.

Recent Developments

On December 1, 2017, the Fund launched Series ETF, an exchange traded series which trades on the Toronto Stock Exchange under the ticker CORP.

Related Party Transactions

As of December 31, 2017, Arrow held 515 Series I units of the Fund with a market value of \$5,521. This represents 0.0% of the net assets of the Fund.

Management Fees

Arrow receives a monthly management fee (the "Management Fee") subject to HST (and any other applicable sales taxes), calculated as a percentage of the Fund's net asset value as of the close of business on each business day. The Management Fee rate applicable to Series A units, Series AI units, Series AN units and Series U units is equal to 1.3% per annum. The Management Fee rate applicable to Series F units, Series FI units, Series FN units, Series G units and Series ETF units is equal to 0.80% per annum. The Fund is also authorized to issue Series I units, for which the Management Fee is negotiable between Arrow and the dealer. For the year ended December 31, 2017, Management Fees charged to the Fund equaled \$1,053,508 (\$522,627 in 2016). The Management Fee is paid in consideration of investment management and administration services. No breakdown of such services was specified in the management agreement. From this Management Fee, the Manager pays fees to the investment advisor (East Coast, in its capacity as such) who provides portfolio management services to the Fund. A portion of the Management Fee paid by the Fund is for trailer fees paid to dealers whose clients hold units of the Fund. The trailer fees are a percentage of the net asset value of the Fund, calculated and payable monthly. The table below outlines the Fund's annual Management Fees and trailer fees.

ANNUAL RATE (%)	Series A, AI, AN, U	Series F, FI, FN, G, ETF	Series I
Management Fees <i>(Annual Rate)</i>	1.3%	0.8%	Negotiable
Trailer Fees <i>(as a % of Management Fees)</i>	15.0%	-	-

The Manager incurs operating expenses on behalf of the Fund and charges these expenses to the Fund. For the year ended December 31, 2017, the Manager has, in its discretion, agreed to absorb \$123,518 of operating expenses associated with the Fund (\$163,537 in 2016).

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help the reader understand the Fund's financial performance. This information is derived from the Fund's financial statements and is represented net of expenses which have been charged to the Fund.

Closing market price	\$20.02

[†]The Fund was launched on June 27, 2014. Series A, AI and F units began operations on July 28, 2014. Series FI units began operations on August 21, 2014. Series FN units began operations on December 5, 2014. Series AN units began operations on January 29, 2015. Series G units began operations on July 15, 2015. Series I units began operations on April 01, 2016. Series ETF units began operations on December 1, 2017.

*Ratios have been annualized.

1. The net assets per unit shown are referenced to net assets attributable to holders of redeemable units determined in accordance with International Financial Reporting Standards ("IFRS") and are derived from the Fund's financial statements. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.
2. Distributions, if any, were reinvested in additional units of the Fund at the discretion of the underlying unitholders.
3. Management expense ratio is based on total expenses (excluding certain taxes, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
4. The Manager has absorbed certain expenses or waived certain fees otherwise payable by the Fund. The amount of expenses absorbed or waived is determined annually at the discretion of the Manager and the Manager can terminate the absorption or waiver at any time.
5. The Fund's portfolio turnover rate can indicate how actively the investment advisor manages the portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of its securities in its

portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
7. Ratios and supplemental data, where applicable, are computed using the net asset value of the Fund.
8. The management expense ratio, management expense ratio before waivers or absorptions and trading expense ratio for the years ended 2016, 2015 and 2014 have been restated to reflect the reclassification of certain custodial transaction costs related to the purchase and sale of securities.

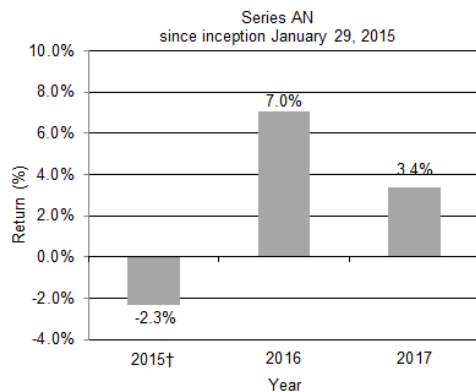

Past Performance

The performance information shown below assumes that all distributions, if any, made by the Fund in the periods shown were reinvested in additional units of the Fund. If you hold the Fund outside a registered plan, you will be taxed on distributions. Distributions of income the Fund earns and capital gains it realizes are taxable in the year received whether received in cash or reinvested in additional units. No adjustment for potential tax consequences to an investor has been made to the performance information.

The indicated rates of return are historical annual compounded total returns including changes in unit value and do not take into account sale, redemption, distribution or other optional charges, that, if applicable, would have reduced returns or performance. An investment in the Fund is not guaranteed. Its value changes frequently and how the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates the Fund's performance for the years shown. It shows, in percentage terms, how much an investment made on the first day of each financial year (or since inception) would have grown or decreased.

†Returns shown represent a partial year.

The chart below illustrates the Fund's annual returns for Series F units by long and short holdings:

Annual Compound Returns (Compound Performance)

The following table shows the total returns of the Fund and for its benchmark, the FTSE TMX Canada Universe Bond Index (a market cap weighted index designed to be a broad measure of the Canadian investment grade fixed income market) for the year shown ended December 31, 2017. The Relative Performance returns show the performance of the Fund as compared to the benchmark.

	1 Year	3 Years	Annualized Since Inception
Series A	3.4%	2.5%	2.2%
Series AI	3.4%	2.6%	2.3%
Series AN	3.4%	2.6%	2.6%
Series F	3.9%	3.1%	2.8%
Series FI	4.0%	3.1%	2.9%
Series FN	3.9%	3.1%	2.9%
Series I	4.8%	n/a	6.9%
Series G	4.4%	n/a	3.7%
Series ETF	n/a	n/a	0.2%*
FTSE TMX Canada Universe Bond Index	2.5%	2.6%	3.2%

*Series ETF units commenced operations on December 1, 2017, therefore the % shown is cumulative from December 1 to December 31, 2017.

Summary of Investment Portfolio as at December 31, 2017
