EXEMPLAR LEADERS FUND

DISCUSSION OF NOTES 4 & 5: FINANCIAL INSTRUMENTS

December 31, 2014

The investment objective of the Exemplar Leaders Fund is to maximize absolute returns on investments through securities selection and asset allocation. The Fund focuses on achieving growth of capital through superior securities selection and pursues a long-term investment program with the aim of generating capital gains. The Fund attempts to reduce volatility through diversifying the portfolio across both economic sectors and market capitalizations (company size and liquidity). The Fund invests primarily in equity and equity-related securities of North American companies. The Fund may also invest in international companies.

RISK MANAGEMENT

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance. All investments present a risk of loss of capital. The maximum loss of capital on long equity, warrants and debt securities is limited to the fair value of those positions. The maximum loss on equities and debt sold short can be unlimited.

The management of these risks is carried out by the Manager and Portfolio Advisor in accordance with Fund's Declaration of Trust.

A general discussion of financial risk management for the Exemplar Funds appears as Note 4: FINANCIAL INSTRUMENTS – RISK MANAGEMENT.

Credit Risk

As at December 31, 2014, December 31, 2013 and January 1, 2013, the Fund had no investments in debt instruments and therefore was not subject to related credit risk.

The Fund is exposed to counterparty credit risk on margin on deposit and receivables for securities sold. The Fund's brokerage agreement requires cash collateral in excess of 150% of the fair value of securities sold short. The Fund's brokerage services are provided BMO Nesbitt Burns which has a credit rating of Aa3 (December 31, 2013: Aa3, January 1, 2013 – A3) as rated by Moody's bond rating services.

The Fund is also exposed to counterparty credit risk on cash and other receivable balances. The Fund's custodial services are provided by CIBC Mellon Trust Company which has a credit rating as rated by Moody's bond rating services of A1 (December 31, 2013: A1, January 1, 2013: Aa3).

The Fund is also exposed to credit risk on cash deposits held at TD Canada Trust which has a credit rating as rated by Moody's bond rating services of Aa1 (December 31, 2013: Aaa, January 1, 2013: Aaa).

Liquidity Risk

All of the Fund's liabilities are typically due in less than 3 months. Redeemable units are redeemable on demand at the holder's option. However, holders of these instruments typically retain them for a longer period.

Market Risk

The following include sensitivity analyses that show how the net assets attributable to holders of redeemable units would have been affected by a reasonably possible change in the relevant risk variable at each reporting date. In practice, the actual results may differ and the differences could be material.

(a) Currency Risk

The tables below indicate the Fund's exposure to USD as at December 31, 2014, December 31, 2013 and January 1, 2013, in Canadian dollar terms. The tables also illustrate the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 10% in relation to USD, with all other variables held constant. Non-monetary items include equities and warrants. Monetary items include cash and other current receivables and payables.

December 31, 2014			Impact on net assets attributable to holders of redeemable units			
Currency	Exposure			Impact on net assets attributable to holders of redeemable units		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
United States Dollar - Long	\$4,099,806	\$10,724,368	\$14,824,174	\$409,981	\$1,072,437	\$1,482,418

United States Dollar - Short	-	(735,573)	(735,573)	-	(73,557)	(73,557)
Total	\$1,587,775	\$10,275,237	\$11,863,012	\$158,777	\$1,027,524	\$1,186,301
% of net assets attributable to holders of redeemable units	4.8%	31.3%	36.1%	0.5%	3.1%	3.6%

January 1, 2013			Impact on net assets attributable to holders of redeemable units			
Currency	Exposure			Impact on net assets attributable to holders of redeemable units		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
United States Dollar - Long	\$574,266	\$5,844,515	\$6,418,781	\$57,427	\$584,451	\$641,878
United States Dollar - Short	-	(346,394)	(346,394)	-	(34,639)	(34,639)
Total	\$574,266	\$5,498,121	\$6,072,387	\$57,427	\$549,812	\$607,239
% of net assets attributable to holders of redeemable units	2.3%	22.2%	24.5%	0.2%	2.2%	2.4%

(b) Interest Rate Risk

As at December 31, 2014, December 31, 2013 and January 1, 2013 the Fund did not hold any interest-bearing securities, and therefore was not subject to significant interest rate risk.

(c) Price Risk

The Fund's policy is to manage price risk through diversification and selection of investments within specified limits established by the investment restrictions within the prospectus, as summarized below.

To achieve the investment objective of the Fund, the Manager: (i) makes long term investments of securities of issuers which the Manager believes present the greatest opportunity for capital appreciation; and (ii) manages the portfolio's sector allocation, increasing and decreasing exposure to different sectors of the market as appropriate.

The impact on net assets of the Fund due to a 5% change in market prices of equity securities with all other variables held constant, is presented in the following table.

	Impact on net assets attributable to holders of redeemable units		
	December 31, 2014	December 31, 2013	January 1, 2013
5% Increase	\$1,490,500	\$1,538,756	\$1,084,301
5% Decrease	\$(1,490,500)	\$(1,538,756)	\$(1,084,301)

The Fund has the ability to take short positions, in total not exceeding 20% of the Net Asset Value of the Fund. Until the Fund covers its short sales, it is exposed to market risk to the extent that subsequent market fluctuations may require purchasing securities sold short at prices which may be significantly higher than the fair value reflected on the financial statements.

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following is a summary of the Fund's concentration risk:

Market Segment	% of net assets attributable to holders of redeemable units		
	December 31, 2014	December 31, 2013	January 1, 2013
Long Positions			
Consumer Discretionary	10.0%	8.4%	6.2%
Consumer Staples	6.5%	8.8%	5.1%
Energy	3.3%	5.9%	10.6%

FAIR VALUE MEASUREMENT

A general discussion of fair value measurement for the Exemplar Funds appears as Note 5: FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT.

The following table illustrates the classification of the Fund's assets and liabilities measured at fair value within the fair value hierarchy as at December 31, 2014, December 31, 2013 and January 1, 2013:

As at December 31, 2014	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$30,717,452	\$26,307	\$1,340	\$30,745,099
Warrants	-	170,764	-	170,764
Total	\$30,717,452	\$197,071	\$1,340	\$30,915,863
Financial liabilities				
Equities sold short	\$(1,105,865)	-	-	\$(1,105,865)
Total	\$(1,105,865)	-	-	\$(1,105,865)

As at December 31, 2013	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$31,251,250	\$731,042	\$1,340	\$31,983,632
Warrants	-	38,962	-	38,962
Total	\$31,251,250	\$770,004	\$1,340	\$32,022,594
Financial liabilities				
Equities sold short	\$(1,247,465)	-	-	\$(1,247,465)
Total	\$(1,247,465)	-	-	\$(1,247,465)

As at January 1, 2013	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$22,575,581	-	\$1,340	\$22,576,921
Total	\$22,575,581	-	\$1,340	\$22,576,921
Financial liabilities				
Equities sold short	\$(890,909)	-	-	\$(890,909)
Total	\$(890,909)	-	-	\$(890,909)

All fair value measurements above are recurring. The carrying values of all of the Fund's financial instruments not carried at FVTPL approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it would be classified as Level 3.

The Portfolio Advisor is responsible for performing the fair value measurements included in the financial statements of the Fund, including Level 3 measurements if any. The Portfolio Advisor obtains pricing from a third party pricing vendor which is monitored and reviewed daily by the finance department. In addition, at each financial reporting date, the Manager reviews and approves all level 3 fair value measurements.

During the year ended December 31, 2014, the Fund transferred equity securities with a fair value of \$728,880 from level 2 to level 1 due to resale restrictions being lifted (December 31, 2013: none).

Most of the Fund's equity positions are classified as level 1 as the securities are actively traded on a recognized exchange and a quoted price is available. Equity positions which have resale restrictions but otherwise trade on the market are classified as level 2.

Warrants are valued using models and valuation techniques commonly used in the industry, including inputs such as underlying stock price, restrictions on exercise and days to expiry. When the inputs that are significant to valuation are generally observable, the warrant is classified as Level 2. Warrants that have significant unobservable inputs are classified as Level 3.

The Fund holds 13,395 Class A shares of NeuroBiopharm Inc. ("Neuro") and 26,790 NeuroBiopharm Inc. warrants which it received by a way of a dividend-in-kind from the parent company of Neuro, Neptune Technologies & Bioresources Inc. ("Neptune"). Neuro is a private company thus the investments are classified as Level 3 for a total amount of \$1,340. The Class A shares of Neuro are determined to have a value of \$0.10 per share, as per the conversion that occurred on April 12, 2011. The warrants, with an exercise price of \$0.75 per warrant, are determined to have a negligible value based using the Black Scholes model.

Financial Instruments By Category

The following table presents the net gains (losses) on investments and derivatives at FVTPL by category for the years ended December 31, 2014 and 2013.

December 31, 2014

EXEMPLAR YIELD FUND
DISCUSSION OF NOTES 4 & 5: FINANCIAL INSTRUMENTS
December 31, 2014

The investment objective of the Exemplar Yield Fund is to provide consistent and tax efficient monthly income and capital appreciation by investing in a diversified portfolio primarily consisting of Canadian equity, global equity, Canadian corporate bonds, income trusts and REITs.

RISK MANAGEMENT

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance. All investments present a risk of loss of capital. The maximum loss of capital on long equity and debt securities is limited to the fair value of those positions.

The management of these risks is carried out by the Manager and Portfolio Advisor in accordance with Fund's Declaration of Trust.

A general discussion of financial risk management for the Exemplar Funds appears as Note 4: FINANCIAL INSTRUMENTS – RISK MANAGEMENT.

Credit Risk

The analysis below summarizes the credit quality of the Fund's debt portfolio at December 31, 2014, December 31, 2013 and January 1, 2013.

Percentage of total debt securities			
Credit Rating*	As at December 31, 2014	As at December 31, 2013	As at January 1, 2013
BBB	22.8%	34.4%	55.6%
BB	25.6%	40.3%	44.4%
B	3.7%	6.1%	-
Not Rated	47.9%	19.2%	-
Total	100.0%	100.0%	100.0%

* Credit ratings are obtained from Standard & Poor's, Moody's and/or Dominion Bond Rating Service. Where multiple ratings were obtained for a security, the lowest rating has been used.

The Fund is also exposed to counterparty credit risk on cash. The Fund's broker and custodial services are provided by CIBC Mellon Trust Company which has a credit rating as rated by Moody's bond rating services of A1 (December 31, 2013: A1, January 1, 2013: Aa3).

The Fund is also exposed to credit risk on cash deposits held at TD Canada Trust which has a credit rating as rated by Moody's bond rating services of Aa1 (December 31, 2013: Aaa, January 1, 2013: Aaa).

Liquidity Risk

All of the Fund's liabilities are typically due in less than 3 months. Redeemable units are redeemable on demand at the holder's option. However, holders of these instruments typically retain them for a longer period.

Market Risk

The following include sensitivity analyses that show how the net assets attributable to holders of redeemable units would have been affected by a reasonably possible change in the relevant risk variable at each reporting date. In practice, the actual results may differ and the differences could be material.

(a) Currency Risk

The tables below indicate the Fund's exposure to USD as at December 31, 2014, December 31, 2013 and January 1, 2013, in Canadian dollar terms. The tables also illustrate the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 10% in relation to USD, with all other variables held constant. Non-monetary items include equities. Monetary items include bonds, cash and other current receivables and payables.

December 31, 2014	Exposure			Impact on net assets attributable to holders of redeemable units		
	Currency	Monetary	Non-Monetary	Total	Monetary	Non-Monetary
United States Dollar- long	\$276,871	\$3,189,573	\$3,466,444	\$27,687	\$318,957	\$346,644
United States Dollar- short	(118,449)	-	(118,449)	(11,845)	-	(11,845)
Total	\$158,422	\$3,189,573	\$3,347,995	\$15,842	\$318,957	\$334,799
% of net assets attributable to holders of redeemable units	1.9%	37.8%	39.7%	0.2%	3.8%	4.0%

December 31, 2013	Exposure			Impact on net assets attributable to holders of redeemable units		
	Currency	Monetary	Non-Monetary	Total	Monetary	Non-Monetary
United States Dollar	\$10,797	\$3,466,146	\$3,476,943	\$1,080	\$346,614	\$347,694
% of net assets attributable to holders of redeemable units	0.1%	33.8%	33.9%	0.0%	3.4%	3.4%

January 1, 2013	Exposure			Impact on net assets attributable to holders of redeemable units		
	Currency	Monetary	Non-Monetary	Total	Monetary	Non-Monetary
United States Dollar	\$132,427	\$2,723,718	\$2,856,145	\$13,243	\$272,372	\$285,615
% of net assets attributable to holders of redeemable units	1.6%	33.1%	34.7%	0.2%	3.3%	3.5%

(b) Interest Rate Risk

The table below summarizes the Fund's exposure to interest rate risk as at December 31, 2014, December 31, 2013 and January 1, 2013. The table also illustrates the potential impact, or sensitivity, on the net assets attributable to holders of redeemable units if the prevailing levels of market interest rates changed by 1.0%, assuming a parallel shift in the yield curve with all other variables held constant.

Term to Maturity	Total Exposure		
	December 31, 2014	December 31, 2013	January 1, 2013
1-3 years	\$187,500	-	-
3-5 years	554,342	\$162,500	-
Greater than 5 years	529,070	664,884	\$517,009
Total	\$1,270,912	\$827,384	\$517,009
Sensitivity:			
Total \$ sensitivity	\$7,514	\$2,178	\$1,204
Total % sensitivity	0.1%	0.00%	0.00%

(c) Price Risk

The Fund's policy is to manage price risk through diversification and selection of investments within specified limits established by the investment restrictions within the prospectus, as summarized below.

To achieve the investment objectives of the Fund, the Portfolio Advisor: (i) will actively manage the asset allocation of the Fund; (ii) will make concentrated investments primarily in Canadian equities, global equities, Canadian corporate bonds, income trusts and REITs; (iii) will invest up to 30% of the assets of the Fund in foreign securities; and (iv) may hold all or a portion of the Fund's assets in cash or money market securities while seeking investment opportunities or for defensive purposes.

The impact on net assets of the Fund due to a 5% change in market prices of equity securities with all other variables held constant, is presented in the following table.

Impact on net assets attributable to holders of redeemable units			
	December 31, 2014	December 31, 2013	January 1, 2013
5% Increase	\$328,752	\$447,321	\$339,348
5% Decrease	\$(328,752)	\$(447,321)	\$(339,348)

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following is a summary of the Fund's concentration risk:

Market Segment	% of net assets attributable to holders of redeemable units		
	December 31, 2014	December 31, 2013	January 1, 2013
Consumer Discretionary	0.8%	1.8%	-
Consumer Staples	1.6%	2.0%	-
Energy	9.4%	16.2%	6.7%
Financial Services	33.7%	28.7%	26.0%
Industrials	11.3%	14.7%	16.4%
Information Technology	5.1%	4.9%	9.8%
Materials	6.4%	10.0%	11.9%
Telecommunication Services	8.1%	4.0%	6.7%
Utilities	1.6%	5.0%	5.0%
Fixed Income	15.0%	8.0%	6.3%

FAIR VALUE MEASUREMENT

A general discussion of fair value measurement for the Exemplar Funds appears as Note 5: FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT.

The following table illustrates the classification of the Fund's assets and liabilities measured at fair value within the fair value hierarchy as at December 31, 2014, December 31, 2013 and January 1, 2013:

As at December 31, 2014	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$6,575,047	-	-	\$6,575,047
Bonds	-	1,270,912	-	1,270,912
Total	\$6,575,047	\$1,270,912	-	\$7,845,959

As at December 31, 2013	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$8,946,426	-	-	\$8,946,426
Bonds	-	827,384	-	827,384
Total	\$8,946,426	\$827,384	-	\$9,773,810

As at January 1, 2013	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$6,786,961	-	-	\$6,786,961
Bonds	-	517,009	-	517,009
Total	\$6,786,961	\$517,009	-	\$7,303,970

All fair value measurements above are recurring. The carrying values of all of the Fund's financial instruments not carried at FVTPL approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or

derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it would be classified as Level 3.

The Portfolio Advisor is responsible for performing the fair value measurements included in the financial statements of the Fund, including Level 3 measurements if any. The Portfolio Advisor obtains pricing from a third party pricing vendor which is monitored and reviewed daily by the finance department. In addition, at each financial reporting date, the Manager reviews and approves all level 3 fair value measurements, if applicable.

As at December 31, 2014, December 31, 2013 and January 1, 2013, the Fund did not hold any level 3 financial instruments. There were no transfers between levels 1, 2 and 3 during the years ending December 31, 2014 or December 31, 2013.

a) Equities

The Fund's equity positions are all classified as Level 1 as each security is actively traded on a recognized exchange and a quoted price is available.

b) Bonds

The Fund's bond holdings are comprised of Canadian and US corporate bonds. Bond pricing is obtained from bid and ask prices provided by independent security pricing services or recognized investment dealers. Bond prices may be derived by using models which include inputs such as interest rate curves, credit spreads and volatilities. The inputs that are significant to valuation are generally observable and therefore the Fund's bonds have been classified as Level 2.

Financial Instruments By Category

The following table presents the net gains (losses) on financial instruments at FVTPL by category for the years ended December 31, 2014 and 2013.

December 31, 2014

	Net realized gains /(losses)	Net unrealized gains /(losses)	Interest income	Interest expense	Dividend income	Dividend expense	Total
Financial assets at FVTPL:							
Designated as FVTPL	\$(235,949)	\$179,571	\$70,567	-	\$422,894	-	\$437,083

EXEMPLAR PERFORMANCE FUND
DISCUSSION OF NOTES 4 & 5: FINANCIAL INSTRUMENTS
December 31, 2014

The investment objective of the Exemplar Performance Fund is to achieve capital appreciation over both short and long term horizons primarily through the selection and management of shares of Canadian equity securities.

RISK MANAGEMENT

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance. All investments present a risk of loss of capital. The maximum loss of capital on long equity and debt securities is limited to the fair value of those positions. The maximum loss on equities and debt sold short can be unlimited.

The management of these risks is carried out by the Manager and Portfolio Advisor in accordance with the Fund's Declaration of Trust.

A general discussion of financial risk management for the Exemplar Funds appears as Note 4: FINANCIAL INSTRUMENTS – RISK MANAGEMENT.

Credit Risk

As at December 31, 2014 the Fund had no investments in debt instruments and therefore was not subject to related credit risk.

The Fund is exposed to counterparty credit risk on margin on deposit, cash held at the broker and receivables for securities sold. The Fund's brokerage agreement requires cash collateral in excess of 150% of the fair value of securities sold short. The Fund's prime brokerage services are provided BMO Nesbitt Burns which has a credit rating of Aa3 as rated by Moody's bond rating services.

The Fund is also exposed to counterparty credit risk on cash and other receivable balances. The Fund's broker and custodial services are provided by CIBC Mellon Trust Company which has a credit rating as rated by Moody's bond rating services of A1.

The Fund is also exposed to credit risk on cash deposits held at TD Canada Trust which has a credit rating as rated by Moody's bond rating services of Aa1.

Liquidity Risk

All of the Fund's liabilities are typically due in less than 3 months. Redeemable units are redeemable on demand at the holder's option. However, holders of these instruments typically retain them for a longer period.

Market Risk

The following include sensitivity analyses that show how the net assets attributable to holders of redeemable units would have been affected by a reasonably possible change in the relevant risk variable at each reporting date. In practice, the actual results may differ and the differences could be material.

(a) Currency Risk

The table below indicates the Fund's exposure to USD as at December 31, 2014 in Canadian dollar terms. The table also illustrates the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 10% in relation to USD, with all other variables held constant. Non-monetary items include equities. Monetary items include cash and other current receivables and payables.

Currency	Exposure			Impact on net assets attributable to holders of redeemable units		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
United States Dollar - Long	\$197,160	\$1,292,266	\$1,489,426	\$19,716	\$129,227	\$148,943
United States Dollar - Short	(45,058)	(5,553)	(50,611)	(4,506)	(555)	(5,061)
Total	\$152,102	\$1,286,713	\$1,438,815	\$15,210	\$128,672	\$143,882
% of net assets attributable to holders of redeemable units	2.0%	17.1%	19.1%	0.2%	1.7%	1.9%

(b) Interest Rate Risk

As at December 31, 2014 the Fund did not hold any interest-bearing securities, and therefore was not subject to significant interest rate risk.

(c) Price Risk

The Fund's policy is to manage price risk through diversification and selection of investments within specified limits established by the investment restrictions within the prospectus, as summarized below.

To achieve the investment objective, the Fund will invest predominantly in large and mid capitalization Canadian companies. Generally, no more than 20% of the Fund is expected to be invested outside of this investment focus. The Fund may also invest in bonds and other debt instruments if warranted by financial conditions. The Fund will not specialize in any one industry other than to concentrate investments in those industries that offer the best opportunities for exceptional returns at each stage of the economic and market cycle.

The Fund may follow a more concentrated investment approach and, from time to time, over weight certain geographic regions and industry sectors when deemed appropriate by the Portfolio Advisor. This may result in the Fund's portfolio weightings being substantially different from the weightings of the S&P/TSX Composite Total Return Index (or its successor index).

The Fund may hold cash or invest in short term securities for the purpose of preserving capital and/or maintaining liquidity, based upon the Portfolio Advisor's ongoing evaluation of current and anticipated economic and market conditions. The Fund may also invest in foreign securities of the same type and characteristics as described above.

The Fund engages in short selling activities, wherein it borrows securities and sells them to third parties. Until the Fund covers its short sales, it is exposed to market risk to the extent that subsequent market fluctuations may require purchasing securities sold short at prices which may be significantly higher than the fair value reflected on the financial statements.

The impact on net assets of the Fund due to a 5% change in market prices of equity securities is \$254,980 (all other variables held constant).

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following is a summary of the Fund's concentration risk as of December 31, 2014:

Market Segment	% of net assets attributable to holders of redeemable units	
	Long Positions	Short Positions
Consumer Discretionary	17.0%	-
Consumer Staples	5.7%	-
Energy	4.8%	(0.3)%
Financial Services	6.3%	(1.3)%
Health Care	5.2%	-
Industrials	13.0%	-
Information Technology	7.7%	-
Materials	9.2%	-
Utilities	0.5%	-

FAIR VALUE MEASUREMENT

A general discussion of fair value measurement for the Exemplar Funds appears as Note 5: FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT.

The following table illustrates the classification of the Fund's assets and liabilities measured at fair value within the fair value hierarchy as at December 31, 2014:

	Level 1	Level 2	Level 3	Total
Financial assets				
Equities	\$5,224,552	-	-	\$5,224,552
Total	\$5,224,552	-	-	\$5,224,552
Financial liabilities				
Equities sold short	\$(124,959)	-	-	\$(124,959)
Total	\$(124,959)	-	-	\$(124,959)

All fair value measurements above are recurring. The carrying values of all of the Fund's financial instruments not carried at FVTPL approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it would be classified as Level 3.

The Portfolio Advisor is responsible for performing the fair value measurements included in the financial statements of the Fund, including Level 3 measurements if any. The Portfolio Advisor obtains pricing from a third party pricing vendor which is monitored and reviewed daily by the finance department. In addition, at each financial reporting date, the Manager reviews and approves all level 3 fair value measurements, if applicable.

As at December 31, 2014, the Fund did not hold any level 2 or level 3 financial instruments. There were no transfers between levels 1, 2 and 3 during the period ending December 31, 2014.

The Fund's equity positions (long and short) are all classified as Level 1 as each security is actively traded on a recognized exchange and a quoted price is available.

Financial Instruments By Category

The following table presents the net gains (losses) on financial instruments at FVTPL by category for the period ended December 31, 2014.

	Net realized gains /(losses)	Net unrealized gains /(losses)	Interest income	Interest expense	Dividend income	Dividend expense	Total
Financial assets at FVTPL:							
Designated as FVTPL	\$(15,310)	\$332,448	-	-	\$31,837	-	\$348,975
Financial liabilities at FVTPL:							
HFT	(808)	(4,922)	-	-	-	\$(1,004)	(6,734)
Total:	\$(16,118)	\$327,526	-	-	\$31,837	\$(1,004)	\$342,241

EXEMPLAR INVESTMENT GRADE FUND
DISCUSSION OF NOTES 4 & 5: FINANCIAL INSTRUMENTS
December 31, 2014

The investment objective of the Exemplar Investment Grade Fund is to generate income and capital preservation by investing in a diversified portfolio of primarily North American investment grade corporate bonds.

RISK MANAGEMENT

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance. All investments present a risk of loss of capital. The maximum loss of capital on long equity, options, interest rate swaps, credit default swaps and debt securities is limited to the fair value of those positions. The maximum loss on equities, options and debt sold short can be unlimited and the maximum loss on futures contracts is the notional contract value of those positions.

The management of these risks is carried out by the Manager and Portfolio Advisor in accordance with the Fund's Declaration of Trust.

The Fund's use of leverage and borrowings can increase the Fund's exposure to these risks, which in turn can also increase the potential returns the Fund can achieve. The Investment Advisor uses leverage against assets with satisfactory liquidity characteristics in order to increase return on capital subject to market conditions.

A general discussion of financial risk management for the Exemplar Funds appears as Note 4: FINANCIAL INSTRUMENTS – RISK MANAGEMENT.

Credit Risk

The analysis below summarizes the credit quality of the Fund's debt portfolio at December 31, 2014.

Credit Rating*	Percentage of total debt securities As at December 31, 2014
AAA	0.0%
AA	4.0%
A	10.6%
BBB	81.1%
BB	4.3%
B	0.0%
Below B	0.0%
Total	100.0%

* Credit ratings are obtained from Standard & Poor's, Moody's and/or Dominion Bond Rating Service.

The Fund is exposed to credit risk on swaps and futures contracts. The counterparties to the Fund's swaps are Bank of America and JP Morgan Chase & Co. which have credit rating as rated by Moody's bond rating services of Baa2 and A3, respectively. Futures contracts are exchange traded. Cash collateral has been provided to JP Morgan Chase & Co. in accordance with terms of derivative transaction agreements.

The Fund is also exposed to counterparty credit risk on cash, margin deposits and other receivable balances. The Fund's broker and custodial services are provided by CIBC Mellon Trust Company which has a credit rating as rated by Moody's bond rating services of A1.

The Fund is also exposed to credit risk on cash deposits held at TD Canada Trust which has a credit rating as rated by Moody's bond rating services of Aa1.

Liquidity Risk

All of the Fund's liabilities are typically due in less than 3 months. Redeemable units are redeemable on demand at the holder's option. However, holders of these instruments typically retain them for a longer period.

From time to time, the Fund may use margin borrowings in one or more of its brokerage accounts. For the period since inception to December 31, 2014, the minimum margin borrowings used was \$0 and the maximum margin borrowings used was \$478,093.

Market Risk

The following include sensitivity analyses that show how the net assets attributable to holders of redeemable units would have been affected by a reasonably possible change in the relevant risk variable at each reporting date. In practice, the actual results may differ and the differences could be material.

(a) Currency Risk

The table below indicates the Fund's exposure to USD as at December 31, 2014 in Canadian dollar terms. The table also illustrates the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 10% in relation to USD, with all other variables held constant. Non-monetary items include non-financial options. Monetary items include futures, bonds, cash, swaps, financial options and other current receivables and payables.

Currency	Exposure			Impact on net assets attributable to holders of redeemable units		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
United States Dollar - Long	\$924,908	-	\$924,908	\$92,490	-	\$92,490
United States Dollar - Short	(43,489)	-	(43,489)	(4,349)	-	(4,349)
Total	\$881,419	-	\$881,419	\$88,141	-	\$88,141
% of net assets attributable to holders of redeemable units	2.3%	-	2.3%	0.2%	-	0.2%

(b) Interest Rate Risk

The table below summarizes the Fund's exposure to interest rate risk as at December 31, 2014. The table also illustrates the potential impact, or sensitivity, on the net assets attributable to holders of redeemable units if the prevailing levels of market interest rates changed by 1.0%, assuming a parallel shift in the yield curve with all other variables held constant.

Term to Maturity	Total exposure December 31, 2014
Less than 1 year	\$500,070
1-3 years	8,927,904
3-5 years	12,942,717
Greater than 5 years	13,435,623
Total	\$35,806,314
Sensitivity:	
Total \$ sensitivity	\$1,487,539
Total % sensitivity	3.9%

(c) Price Risk

The Fund's policy is to manage price risk through pursuit of a diversified investment program that focuses on investment-grade fixed income securities while utilizing other assets such as options and credit default swaps, to extract relative value and to manage credit exposure.

The Fund engages in short selling activities, wherein it borrows securities and sells them to third parties. Until the Fund covers its short sales, it is exposed to market risk to the extent that subsequent market fluctuations may require purchasing securities sold, not yet purchased, at prices which may be significantly higher than the fair value reflected on the financial statements.

As at December 31, 2014, if the Fund's relevant benchmark index, FTSE TMX Canada All Corporate Bond Index, had increased or decreased by 5%, with all other variables held constant, the net assets attributable to holders of redeemable units of the Fund would have increased or decreased by \$117,161.

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following is a summary of the Fund's concentration risk as of December 31, 2014:

Market Segment	% of net assets attributable to holders of redeemable units
	Long Positions
Communications	24.0%
Consumer, Cyclical	2.9%
Consumer, Non-cyclical	12.1%
Energy	9.3%
Financials	31.6%
Government	0.6%
Utilities	13.9%

FAIR VALUE MEASUREMENT

A general discussion of fair value measurement for the Exemplar Funds appears as Note 5: FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT.

The following table illustrates the classification of the Fund's assets and liabilities measured at fair value within the fair value hierarchy as at December 31, 2014:

	Level 1	Level 2	Level 3	Total
Financial assets				
Bonds	-	\$35,806,314	-	\$35,806,314
Derivatives	\$1,430	522,799	-	524,229
Total	\$1,430	\$36,329,113	-	\$36,330,543
Financial liabilities				
Derivatives	(69,371)	(53,737)	-	(123,108)
Total	\$(69,371)	\$(53,737)	-	\$(123,108)

All fair value measurements above are recurring. The carrying values of all of the Fund's financial instruments not carried at FVTPL approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it would be classified as Level 3.

The Portfolio Advisor is responsible for performing the fair value measurements included in the financial statements of the Fund, including Level 3 measurements if any. The Portfolio Advisor obtains pricing from a third party pricing vendor which is monitored and reviewed daily by the finance department. In addition, at each financial reporting date, the Manager reviews and approves all level 3 fair value measurements, if applicable.

As at December 31, 2014, the Fund did not hold any level 3 financial instruments. There were no transfers between levels 1, 2 and 3 during the period ending December 31, 2014.

a) Bonds

The Fund's bond holdings are comprised of Canadian and US corporate bonds. Bond pricing is obtained from bid and ask prices provided by independent security pricing services or recognized investment dealers. Bond prices may be derived by using models which include inputs such as interest rate curves, credit spreads and volatilities. The inputs that are significant to valuation are generally observable and therefore the Fund's bonds have been classified as Level 2.

b) Derivatives

Derivative assets and liabilities consist of futures contracts, options and interest rate swaps. Long and short futures contracts and options are exchange traded and are classified as Level 1 as they are actively traded on a recognized exchange and a quoted price is available. Interest rate swaps are valued using indicative bid/ask prices from third party broker dealers. The inputs that are significant to valuation are generally observable and therefore interest rate swaps have been classified as Level 2.

Financial Instruments By Category

The following table presents the net gains (losses) on financial instruments at FVTPL by category for the period ended December 31, 2014.

	Net realized gains/(losses)	Net unrealized gains/(losses)	Interest income	Interest expense	Dividend income	Dividend expense	Total
Financial assets at FVTPL:							
Designated as FVTPL	\$(2,796)	\$131,737	\$212,008	-	-	-	\$340,949
HFT	67,187	(46,699)	-	-	-	-	20,488
	64,391	85,038	212,008	-	-	-	361,437
Financial liabilities at FVTPL:							
HFT	(173,324)	(69,371)	-	-	-	-	(242,695)
Total:	\$(108,933)	\$15,667	\$212,008	-	-	-	\$118,742

EXEMPLAR TACTICAL CORPORATE BOND FUND
DISCUSSION OF NOTES 4 & 5: FINANCIAL INSTRUMENTS
December 31, 2014

The investment objective of the Exemplar Tactical Corporate Bond Fund is to generate income and capital appreciation by primarily investing in a diversified portfolio of corporate bonds.

RISK MANAGEMENT

The Fund's overall risk management program seeks to maximize the returns derived for the level of risk to which the Fund is exposed and seeks to minimize potential adverse effects on the Fund's financial performance. All investments present a risk of loss of capital. The maximum loss of capital on long equity, options, interest rate swaps, credit default swaps and debt securities is limited to the fair value of those positions. The maximum loss on equities, options and debt sold short can be unlimited and the maximum loss on futures contracts is the notional contract value of those positions.

The management of these risks is carried out by the Manager and Portfolio Advisor in accordance with the Fund's Declaration of Trust.

The Fund's use of leverage and borrowings can increase the Fund's exposure to these risks, which in turn can also increase the potential returns the Fund can achieve. The Investment Advisor uses leverage against assets with satisfactory liquidity characteristics in order to increase return on capital subject to market conditions.

A general discussion of financial risk management for the Exemplar Funds appears as Note 4: FINANCIAL INSTRUMENTS – RISK MANAGEMENT.

Credit Risk

The analysis below summarizes the credit quality of the Fund's debt portfolio at December 31, 2014.

Credit Rating*	Percentage of total debt securities As at December 31, 2014
AAA	1.5%
AA	18.4%
A	5.1%
BBB	42.9%
BB	18.1%
B	6.0%
Below B	0.0%
Unrated	8.0%
Total	100.0%

* Credit ratings are obtained from Standard & Poor's, Moody's and/or Dominion Bond Rating Service.

The Fund is exposed to credit risk on swaps and futures contracts. The counterparties to the Fund's swaps are Bank of America and JP Morgan Chase & Co. which have credit rating as rated by Moody's bond rating services of Baa2 and A3, respectively. Futures contracts are exchange traded. Cash collateral has been provided to Bank of America in accordance with terms of derivative transaction agreements.

The Fund is also exposed to counterparty credit risk on cash and other receivable balances. The Fund's broker and custodial services are provided by CIBC Mellon Trust Company which has a credit rating as rated by Moody's bond rating services of A1.

The Fund is also exposed to credit risk on cash deposits held at TD Canada Trust which has a credit rating as rated by Moody's bond rating services of Aa1.

Liquidity Risk

All of the Fund's liabilities are typically due in less than 3 months. Redeemable units are redeemable on demand at the holder's option. However, holders of these instruments typically retain them for a longer period.

Market Risk

The following include sensitivity analyses that show how the net assets attributable to holders of redeemable units would have been affected by a reasonably possible change in the relevant risk variable at each reporting date. In practice, the actual results may differ and the differences could be material.

(a) Currency Risk

The table below indicates the Fund's exposure to USD as at December 31, 2014 in Canadian dollar terms. The table also illustrates the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 10% in relation to USD, with all other variables held constant. Monetary items include bonds, futures, swaps, cash and other current receivables and payables. Non-monetary items include warrants.

Currency	Exposure			Impact on net assets attributable to holders of redeemable units		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
United States Dollar - Long	\$1,831,988	-	\$1,831,988	\$183,199	-	\$183,199
United States Dollar - Short	(32,246)	-	(32,246)	(3,225)	-	(3,225)
Total	\$1,799,742	-	\$1,799,742	\$179,974	-	\$179,974
% of net assets attributable to holders of redeemable units	8.2%	-	8.2%	0.8%	-	0.8%

(b) Interest Rate Risk

The table below summarizes the Fund's exposure to interest rate risk as at December 31, 2014. The table also illustrates the potential impact, or sensitivity, on the net assets attributable to holders of redeemable units if the prevailing levels of market interest rates changed by 1.0%, assuming a parallel shift in the yield curve with all other variables held constant.

Term to Maturity	Total exposure December 31, 2014
Less than 1 year	\$350,049
1-3 years	7,050,320
3-5 years	6,696,801
Greater than 5 years	6,210,356
Total	\$20,307,526
Sensitivity:	
Total \$ sensitivity	\$650,077
Total % sensitivity	2.9%

(c) Price Risk

The Fund's policy is to manage price risk through pursuit of a diversified investment program that focuses on investment-grade fixed income securities while utilizing other assets such as options and credit default swaps, to extract relative value and to manage credit exposure.

The Fund engages in short selling activities, wherein it borrows securities and sells them to third parties. Until the Fund covers its short sales, it is exposed to market risk to the extent that subsequent market fluctuations may require purchasing securities sold, not yet purchased, at prices which may be significantly higher than the fair value reflected on the financial statements.

As at December 31, 2014, if the Fund's relevant benchmark index, Bank of America Merrill Lynch US High Yield Master II Total Return Index (CAD), had increased or decreased by 5%, with all other variables held constant, the net assets attributable to holders of redeemable units of the Fund would have increased or decreased by \$14,262.

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

The following is a summary of the Fund's concentration risk as of December 31, 2014:

Market Segment	% of net assets attributable to holders of redeemable units
	Fixed Income Long Positions
Communications	22.5%
Consumer, Cyclical	0.1%
Consumer, Non-cyclical	8.0%
Energy	2.0%
Financial Services	51.2%
Industrials	2.3%
Utilities	5.9%

FAIR VALUE MEASUREMENT

A general discussion of fair value measurement for the Exemplar Funds appears as Note 5: FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT.

The following table illustrates the classification of the Fund's assets and liabilities measured at fair value within the fair value hierarchy as at December 31, 2014:

	Level 1	Level 2	Level 3	Total
Financial assets				
Fixed Income Long	-	\$20,307,526	-	\$20,307,526
Derivatives	363	-	-	363
Total	\$363	\$20,307,526	-	\$20,307,889
Financial liabilities				
Derivatives	(28,672)	(23,379)	-	(52,051)
Total	\$(28,672)	\$(23,379)	-	\$(52,051)

All fair value measurements above are recurring. The carrying values of all of the Fund's financial instruments not carried at FVTPL approximate their fair values due to their short-term nature. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it would be classified as Level 3.

The Portfolio Advisor is responsible for performing the fair value measurements included in the financial statements of the Fund, including Level 3 measurements if any. The Portfolio Advisor obtains pricing from a third party pricing vendor which is monitored and reviewed daily by the finance department. In addition, at each financial reporting date, the Manager reviews and approves all level 3 fair value measurements, if applicable.

As at December 31, 2014, the Fund did not hold any level 3 financial instruments. There were no transfers between levels 1, 2 and 3 during the period ending December 31, 2014.

a) Bonds

The Fund's bond holdings are comprised of Canadian and US corporate bonds. Bond pricing is obtained from bid and ask prices provided by independent security pricing services or recognized investment dealers. Bond prices may be derived by using models which include inputs such as interest rate curves, credit spreads and volatilities. The inputs that are significant to valuation are generally observable and therefore the Fund's bonds have been classified as Level 2.

b) Derivatives

Derivative assets and liabilities consist of futures contracts and interest rate swaps. Futures contracts are exchange traded and are classified as Level 1 as they are actively traded on a recognized exchange and a quoted price is available. Interest rate swaps are valued using indicative bid/ask prices from third party broker dealers. The inputs that are significant to valuation are generally observable and therefore interest rate swaps have been classified as Level 2.

c) Warrants

Warrants are valued using models and valuation techniques commonly used in the industry, including inputs such as underlying stock price, restrictions on exercise and days to expiry. When the inputs that are significant to valuation are generally observable, the warrant is classified as Level 2. Warrants that have significant unobservable inputs are classified as Level 3.

Financial Instruments By Category

The following table presents the net gains (losses) on financial instruments at FVTPL by category for the period ended December 31, 2014.

	Net realized gains/(losses)	Net unrealized gains/(losses)	Interest income	Interest expense	Dividend income	Dividend expense	Total
Financial assets at FVTPL:							
Designated as FVTPL	\$16,886	\$11,811	\$188,306	-	-	-	\$217,003
Financial liabilities at FVTPL:							
HFT	(207,120)	(42,409)	-	-	-	-	(249,529)
Total:	\$(190,234)	\$(30,598)	\$188,306	-	-	-	\$(32,526)

The accompanying notes are an integral part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS

December 31, 2014

1. THE FUNDS

Exemplar Leaders Fund, Exemplar Yield Fund, Exemplar Performance Fund, Exemplar Investment Grade Fund, and Exemplar Tactical Corporate Bond Fund (the "Funds") are unincorporated open-ended mutual fund trusts created under the laws of the Province of Ontario pursuant to a declaration of trust dated August 27, 2007, as amended from time to time (the "Declaration of Trust").

Arrow Capital Management Inc. ("Arrow") is the manager ("Manager") of the Funds and portfolio advisor ("Portfolio Advisor") of the Exemplar Leaders Fund, Exemplar Yield Fund and Exemplar Performance Fund. The address of the Funds' registered office is 36 Toronto Street, Suite 750, Toronto, Ontario, M5C 2C5.

East Coast Fund Management Inc. is the Portfolio Advisor of the Exemplar Investment Grade Fund and Exemplar Tactical Corporate Bond Fund.

Prior to December 2, 2013, the manager and portfolio advisor of Exemplar Leaders Fund and Exemplar Yield Fund was BluMont Capital Corporation ("BluMont").

On December 2, 2013, Arrow acquired all the outstanding shares of BluMont, resulting in a change of control of BluMont. On April 1, 2014, Arrow and BluMont amalgamated, continuing under the name "Arrow Capital Management Inc.". At a special meeting of unitholders on November 27, 2013, the unitholders of the Funds approved a change of manager from BluMont to Arrow.

The financial statements are as at years ended December 31, 2014, December 31, 2013 and January 1, 2013 and for the years then ending, with the exception of Exemplar Performance Fund, Exemplar Investment Grade Fund and Exemplar Tactical Corporate Bond Fund which are as at the period ended December 31, 2014 and for the period from commencement of operations as indicated below to December 31, 2014.

On March 6, 2014, Arrow launched the Exemplar Performance Fund which commenced operations on March 24, 2014.

On June 27, 2014, Arrow launched the Exemplar Investment Grade Fund which commenced operations July 28, 2014.

On June 27, 2014, Arrow launched the Exemplar Tactical Corporate Bond Fund which commenced operations on July 28, 2014.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Basis of Presentation and Adoption of IFRS

These financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (IASB). The Funds adopted this basis of accounting in 2014 as required by Canadian securities legislation and the Canadian Accounting Standards Board. Previously, the Exemplar Leaders Fund and Exemplar Yield Fund prepared their financial statements in accordance with Canadian generally accepted accounting principles as defined in Part V of the Chartered Professional Accountant (CPA) Canada Handbook ("Canadian GAAP"). The Funds have consistently applied the accounting policies used in the preparation of their opening IFRS statement of financial position at January 1, 2013 and throughout all periods presented, as if these policies had always been in effect. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

Note 11 discloses the impact of the transition to IFRS on the Funds' reported financial position, financial performance and cash flows, including the nature and effect of significant changes in accounting policies from those used in the Funds' financial statements for the year ended December 31, 2013 prepared under Canadian GAAP.

These financial statements were authorized for issue by the Manager on March 31, 2015.

b) Financial Instruments

The Funds recognize financial instruments at fair value upon initial recognition, plus transaction costs in the case of financial instruments not measured at fair value through profit and loss ("FVTPL"). Regular way purchases and sales of financial assets are recognized at their trade date. The Funds' long equity positions are designated at FVTPL. The Funds'

short investment positions, warrants, futures, swaps and options, if applicable, are classified as held for trading ("HFT") and are measured at FVTPL. The Funds' obligation for net assets attributable to holders of redeemable units is presented at the redemption amount. All other financial assets and liabilities are measured at amortized cost. Under this method, financial assets and liabilities reflect the amount required to be received or paid, discounted, when appropriate, at the contract's effective interest rate. The Funds' accounting policies for measuring the fair value of its investments and derivatives are the same as those used in measuring its net asset value ("NAV") for transactions with unitholders. There were no differences between the net assets attributable to holders of redeemable units used for reporting purposes under IFRS and that used for transactions with unitholders as at December 31, 2014, December 31, 2013 and January 1, 2013.

Realized gains and losses on sale of investments and unrealized appreciation or depreciation in investments are determined on an average cost basis. Realized gains and losses on securities sold short and unrealized appreciation or depreciation on securities sold short are calculated with reference to the average proceeds of the related securities. Average cost does not include amortization of premiums or discounts on fixed income securities.

Interest for distribution purposes shown on the statements of comprehensive income represents the coupon interest received by a Fund accounted for on an accrual basis.

The Funds do not amortize premiums or discounts received on the purchase of fixed income securities.

Dividend income and expense is recognized in the statement of comprehensive income on the ex-dividend date.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. In the normal course of business, the Funds enter into various master netting agreements or similar agreements that do not meet the criteria for offsetting in the statement of financial position but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy or termination of the contracts.

c) Financial Instruments - Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets is based on quoted market prices at the close of trading on the reporting date. The Funds use the last traded market price for securities where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. The fair value of bonds is determined using mid-market pricing derived from bid and ask prices provided by independent security pricing services or recognized investment dealers. Gains and losses arising from changes in the fair value of financial assets or liabilities are presented in the statement of comprehensive income. The Funds' policy is to recognize transfers into and out of the fair value hierarchy levels at the beginning of each period.

The fair value of financial assets and liabilities that are not traded in an active market is determined using valuation techniques. The Funds may use a variety of methods and make assumptions that are based on market conditions existing at each reporting date. Valuation techniques include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same and other commonly used methods by market participants which make the maximum use of observable inputs.

d) Impairment of Financial Assets

At each reporting date, each Fund assesses whether there is objective evidence that a financial asset at amortized cost is impaired. If such evidence exists, the Fund recognizes an impairment loss as the difference between the amortized cost of the financial asset and the present value of future cash flows discounted using the asset's original effective interest rate. Impairment losses on financial assets at amortized cost are reversed in subsequent years if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

e) Foreign Currency Translation

The Funds' functional and presentation currency is the Canadian dollar.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that transactions occur. Foreign currency assets and liabilities denominated in a foreign currency are translated into the functional currency using the exchange rate prevailing at the measurement date. Foreign exchange gains and losses relating to cash are presented as 'Foreign exchange gain (loss)' and those relating to investments and derivatives are presented within 'Net realized gain (loss) on investments and derivatives' and 'Net change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income.

f) Cash

Cash is comprised of deposits with financial institutions.

g) Margin Deposit

Cash collateral provided by each Fund to brokers for securities sold short and counterparties to derivative transactions is identified in that Fund's statement of financial position as 'Margin deposit'.

h) Margin Loan

Margin loan represents cash amounts borrowed under a margin agreement with a Fund's broker and is payable upon demand (if applicable).

i) Forward Currency Contracts

The Funds may enter into forward currency contracts for purposes of minimizing currency exposure or to establish an exposure to a particular currency. The value of forward currency contracts entered into by a Fund is recorded as the difference between the contract rate and the current forward rates at the measurement date, applied to the contract's notional amount and adjusted for counterparty risk. The change in the fair value of forward currency contracts is included in 'Net change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income. Upon closing of a contract, the gain or loss is included in 'Net realized gain (loss) on investments and derivatives' in the statement of comprehensive income.

j) Options

An option is a contractual arrangement under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, either to buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. When a Fund purchases an option, an amount equal to fair value which is based on the premium paid is recorded as an asset. When a Fund writes an option, an amount equal to fair value which is based on the premium received by the Fund is recorded as a liability. Options held by a Fund are exchange-traded. Subsequent to initial recognition, changes in fair value, the difference between the premium paid or received, and fair value, are presented in 'Change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income. When options are closed, the difference between the premium and the amount paid or received, net of brokerage commissions, or the full amount of the premium if the option expires worthless, is recognized as a gain or loss and is presented in the statement of comprehensive income within 'Net realized gain (loss) on investments and derivatives'.

k) Futures Contracts

The Funds may purchase or sell exchange traded futures contracts. Futures contracts are contractual obligations to buy or sell financial instruments or commodities on a future date at a specified price established in an organized market. Subsequent to initial recognition, changes in fair value are presented in 'Change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income. When futures contracts are closed out, the gain or loss is presented in the statement of comprehensive income within 'Net realized gain (loss) on investments and derivatives'.

l) Credit Default Swap Contracts

A credit default swap contract is an agreement to transfer credit risk from one party, a buyer of protection, to another party, a seller of protection. The Fund as a seller of protection would be required to pay a notional or other agreed upon value to the buyer of protection in the event of a default by a third party. In return, the Fund would receive from the

counterparty a periodic stream of payments over the term of the contract provided that no event of default occurs. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations.

The Fund as a buyer of protection would receive a notional or other agreed upon value from the seller of protection in the event of a default by a third party. In return, the Fund would be required to pay to the counterparty a periodic stream of payments over the term of the contract provided that no event of default occurs.

Premiums received or paid for entering into a credit default swap are included in the statement of financial position as either an asset or liability. Credit default swap contracts are fair valued on each valuation day based upon quotations from independent security pricing sources. The change in the difference between the premium and the fair value is included in 'Net change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income. Upon closing or expiry of a contract, the gain or loss is included in 'Net realized gain (loss) on investments and derivatives' in the statement of comprehensive income.

m) Interest Rate Swap Contracts

An interest swap contract is a contractual agreement entered into between the Fund and a counterparty under which each party agrees to exchange periodic fixed or variable payments, based upon a stated notional amount, over the stated life of the agreement. The net differential paid or received is recognized over the life of the agreement as a realized gain or loss on investments. Interest rate swap contracts are fair valued on each valuation day using indicative bid/ask prices from third party broker dealers. The change in fair value is included in 'Net change in unrealized appreciation (depreciation) in value of investments and derivatives' in the statement of comprehensive income. Upon closing or expiry of a contract, the gain or loss is included in 'Net realized gain (loss) on investments and derivatives' in the statement of comprehensive income.

n) Commissions and Other Portfolio Transaction Costs

Commissions and other portfolio transaction costs are incremental costs that are directly attributable to the acquisition or disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers. Such costs are expensed when incurred.

o) Income and Expense Allocation

The net assets of each series of each Fund are computed by calculating the value of that series' proportionate share of that Fund's assets less that series' proportionate share of that Fund's common liabilities less series specific liabilities, if any. Expenses directly attributable to a series are charged to that series. Other income, expenses and gains/losses are allocated based on a reasonable allocation methodology which will include allocations based on the assets of the Funds or the number of unitholders in the Funds or other methodology the Manager determines is fair.

p) Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit

The increase (decrease) in net assets attributable to holders of redeemable units per unit is calculated by dividing the increase (decrease) in net assets attributable to the series divided by the weighted average number of redeemable units outstanding in that series during the period. Refer to Note 10 for the calculation.

q) Classification of Redeemable Units

The Funds' redeemable units contain multiple contractual obligations and multiple series of units have been issued which do not have identical features. Consequently, the units do not meet the conditions in IAS 32 to be classified as equity. As a result, the Funds' obligations for net assets attributable to holders of redeemable units are presented at the redemption amounts.

r) Investments in Structured Entities

The Funds may invest in underlying funds ("Underlying Funds") that are managed by their respective Investment Advisors and whose investment objectives may range from achieving short-term to long-term income and capital growth. Underlying Funds may use leverage in a manner consistent with their respective objectives and as permitted by their respective governing regulatory authorities. Underlying Funds finance their operations by issuing redeemable units which are puttable at the holder's option and entitles the holder to a proportionate stake in the respective fund's net assets. The Funds' interest in Underlying Funds as at December 31, 2014 and 2013, and January 1, 2013, held the form of redeemable

units, which are included at their fair value in the Statements of Financial Position which represents the Funds' maximum exposure in these Underlying Funds. The Funds do not provide, and have not committed to provide, any additional significant financial or other support to the Underlying Funds. The change in fair value of each of the Underlying Funds during the periods is included in 'Change in unrealized appreciation (depreciation) of value of investments and derivatives' and 'Net gains (losses) on investments and derivatives' in the Statements of Comprehensive Income.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates that the Manager has made in preparing the financial statements:

Use of Estimates

Fair Value measurement of derivatives and securities not quoted in an active market

The Funds may hold financial instruments that are not quoted in active markets, including derivatives. Fair value of such instruments is determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, a Fund may value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Manager, independent of the party that created them.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Manager to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments. The Funds consider observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to Note 4 for further information about the fair value measurement of the Fund's financial instruments.

Use of Judgments

Classification and Measurement of Investments and Application of the Fair Value Option

In classifying and measuring financial instruments held by the Funds, the Manager is required to make significant judgments about whether or not the business of the Funds is to invest on a total return basis for the purpose of applying the fair value option for financial assets under IAS 39, *Financial Instruments - Recognition and Measurement* (IAS 39). The most significant judgments made include the determination that certain investments are held-for-trading and that the fair value option can be applied to those which are not.

Determination if Underlying Funds Meet the Structured Entity Definition

The Funds have concluded that their investments in the Underlying Funds are investments in unconsolidated structured entities. This represents a significant judgment by the Funds that is based generally on the fact that the decision making about the Underlying Funds investing activities is not governed by voting rights held by the Funds and other investors.

4. FINANCIAL INSTRUMENTS – RISK MANAGEMENT

In the normal course of business, each Fund is exposed to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate risk, other price risk and currency risk). Please refer to Discussion of Note 4: Financial Instruments – Risk Management for each Fund's specific risk disclosure.

Credit Risk

The Funds may be exposed to credit risk, which is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Where a Fund invests in debt instruments and derivatives, this represents the main concentration of credit risk. The Funds are also exposed to counterparty credit risk on cash, margin deposits and other receivable balances.

All transactions in listed securities are settled or paid for upon delivery using approved brokers. The credit risk related to the associated receivables is considered limited, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. However, there are risks involved in dealing with custodians or prime brokers who settle trades and in rare circumstances, the securities and other assets deposited with the custodian or broker may be exposed to credit risk with regard to such parties. In addition, there may be practical problems or time delays associated with enforcing a Fund's rights to its assets in the case of an insolvency of any such party.

Liquidity Risk

Liquidity risk is the risk that a Fund will encounter difficulty in meeting obligations associated with financial liabilities. Each Fund is exposed to daily cash redemptions and as such, retains sufficient cash to fund anticipated redemptions. Each Fund aims to retain sufficient cash to maintain adequate liquidity including coverage of obligations related to short sales (if applicable) and all current liabilities. In addition, each Fund generally invests in securities that are highly liquid and where there is an observable market price that is quoted by multiple dealers.

Market Risk

The Funds' investments are subject to market risk which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a) Currency Risk

The Funds invest in financial instruments and enter into transactions that are denominated in currencies other than the Canadian dollar. Consequently, the Funds are exposed to currency risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Funds may enter into foreign exchange currency contracts to reduce their foreign currency exposure.

b) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. A Fund may hold securities with fixed interest rates that expose that Fund to fair value interest rate risk.

c) Price Risk

The Funds are exposed to price risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk). The Funds' investments are subject to the risk of changes in the prices of equity securities, bonds and derivatives.

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type.

Capital Risk Management

Units issued and outstanding are considered to be the capital of the Funds. The Funds do not have any specific capital requirements on the subscription and redemption of units, other than certain minimum subscription requirements. Unitholders are entitled to require payment of the net asset value per unit of a Fund for all or any of the units of such unitholder by giving written notice to the Manager. The written notice is irrevocable and must be received no later than 4:00 p.m., EST, on the valuation day upon which the units are to be redeemed (a "Redemption Date"). The redeeming unitholder will receive payment in respect of any units surrendered for redemption on or before the 3rd business day immediately following a Redemption Date, subject to the Manager's right to suspend redemptions in certain circumstances.

5. FINANCIAL INSTRUMENTS – FAIR VALUE MEASUREMENT

Each Fund classifies fair value measurements within a hierarchy which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Please refer to Discussion of Note 5: Financial Instruments – Fair Value Measurement for each Fund's specific risk disclosure.

The three levels of the fair value hierarchy are:

- Level 1:** Quoted prices (unadjusted) in active markets for identical assets or liabilities that a Fund can access at the measurement date,
- Level 2:** Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly or indirectly; and
- Level 3:** Inputs that are unobservable for the asset or liability.

If inputs of different levels are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement.

6. INVESTMENT IN UNDERLYING FUNDS

Information related to investments in Underlying Funds is as follows:

Exemplar Leaders Fund - December 31, 2014

	Fair Value of Fund's Investment in Underlying Fund \$	Net Assets Attributable to Holders of Redeemable Units %	Ownership of Underlying Fund %
Boyd Group Income Fund	452,200	1.3	0.1
Noranda Income Fund	479,915	1.3	0.7

8. RELATED PARTY TRANSACTIONS

The Manager is responsible for making decisions relating to the investment of the Funds' assets and providing key management personnel.

The Arrow Yield Fund invests in units of the Exemplar Yield Fund. The number of units owned by the Arrow Yield Fund is summarized as follows:

As of December 31, 2014:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Exemplar Yield Fund – Series F	131,085	1,403,920	16.6

As of December 31, 2013:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Exemplar Yield Fund – Series F	135,385	1,470,690	14.3

As of December 31, 2014, the number of units owned by the Manager for each Fund is summarized as follows:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Exemplar Yield Fund – Series A	4,524	46,416	0.6
Exemplar Yield Fund – Series F	501	5,366	0.0
Exemplar Performance Fund – Series A	500	5,450	0.0
Exemplar Performance Fund – Series F	16,192	176,984	2.3
Exemplar Investment Grade Fund – Series A	505	5,005	0.0
Exemplar Tactical Corporate Bond Fund -Series AI	512	4,961	0.0
Exemplar Tactical Corporate Bond Fund -Series FI	66,164	642,452	2.9

As of December 31, 2013, the number of units owned by the Manager for each Fund is summarized as follows:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Exemplar Yield Fund – Series A	4,365	45,938	0.5
Exemplar Yield Fund – Series F	483	5,252	0.1

As of January 1, 2013, the number of units owned by the Manager for each Fund is summarized as follows:

Fund	Number of units	Amount (\$)	% of net assets attributable to holders of redeemable units
Exemplar Yield Fund – Series A	4,078	40,821	0.5
Exemplar Yield Fund – Series F	458	4,621	0.1

Management and Performance Fees

Management fees are calculated and accrued daily and paid monthly and are subject to HST (and any other applicable taxes). The management fee rates are as follows:

Fund	Series						
	A	AI	AN	F	FI	FN	L
Exemplar Leaders Fund	1.80%	n/a	n/a	0.80%	n/a	n/a	1.8%
Exemplar Yield Fund	2.00%	n/a	n/a	1.00%	n/a	n/a	2.25%
Exemplar Performance Fund	2.00%	n/a	n/a	1.00%	n/a	n/a	2.30%
Exemplar Investment Grade Fund	1.30%	1.30%	1.30%	0.80%	0.80%	0.80%	n/a
Exemplar Tactical Corporate Bond Fund	1.75%	1.75%	1.75%	1.0%	1.0%	1.0%	2.0%

A holder of Series I units of a Fund, if applicable, pays a negotiated management fee directly to Arrow. The management fee in respect of Series I units will be different for each investor, and will not exceed 2.50% per year.

In addition, the Funds (except in the case of Exemplar Yield Fund, Exemplar Investment Grade Fund, and Exemplar Tactical Corporate Bond Fund) pay the Manager an annual performance fee (the "Performance Fee"), equal to 20% of the amount by which

the Funds outperform their respective indices. The Performance Fee is calculated and accrued daily and paid annually on a calendar year basis and is subject to HST (and any other applicable taxes). If the performance of a series of a Fund in any year is less than the performance of the indices described below (the "Return Deficiency"), then no Performance Fee will be payable in any subsequent year until the performance of the applicable series, on a cumulative basis calculated from the first of such subsequent years, has exceeded the amount of the Return Deficiency.

Exemplar Leaders Fund

The Exemplar Leaders Fund will pay Arrow an annual Performance Fee equal to a percentage of the average net asset value of Series A units and Series F units of the Fund. Such percentage will be equal to 20% of the difference by which the return in the net asset value per unit of the applicable series from January 1 to December 31 exceeds the greater of: (i) 0%; and (ii) the percentage return of the S&P/TSX Composite Total Return Index for the same period.

Exemplar Performance Fund

A Performance Fee will be payable in all circumstances where the performance of the Fund exceeds that of the S&P TSX Composite Total Return Index, even in circumstances where the overall performance of the Fund has declined in a particular year, but as long as the performance of the Fund is positive since the last date that a performance fee was paid by the Fund. The S&P TSX Composite Total Return Index is comprised of most of the largest companies on the Toronto Stock Exchange as measured by market capitalization with any distributions reinvested.

Each Fund is responsible for all operating expenses incurred by or on behalf of that Fund.

Accrued management fees and performance fees (excluding HST) included in other liabilities on the statements of financial position are as follows:

	December 31, 2014		December 31, 2013		January 1, 2013	
	Management Fees (\$)	Performance Fees (\$)	Management Fees (\$)	Performance Fees (\$)	Management Fees (\$)	Performance Fees (\$)
Exemplar Leaders Fund	50,662	-	48,730	663,461	36,772	7,117
Exemplar Yield Fund	12,185	-	12,762	-	11,567	-
Exemplar Performance Fund	8,101	-	-	-	-	-
Exemplar Investment Grade Fund	33,567	-	-	-	-	-
Exemplar Tactical Corporate Bond Fund	25,136	-	-	-	-	-

Brokerage Commissions

Total commissions paid to dealers for the periods ended December 31, 2014 and 2013 in connection with portfolio transactions are as follows:

	December 31, 2014	December 31, 2013
Exemplar Leaders Fund	\$31,801	\$23,964
Exemplar Yield Fund	\$5,672	\$30,690
Exemplar Performance Fund	\$1,982	n/a
Exemplar Investment Grade Fund	\$843	n/a
Exemplar Tactical Corporate Bond Fund	\$753	n/a

Total commissions used to purchase market data services by the Funds for the periods ended December 31 and 2013 are as follows:

	December 31, 2014	December 31, 2013
Exemplar Leaders Fund	\$12,571	-
Exemplar Yield Fund	\$3,242	-
Exemplar Performance Fund	\$1,451	n/a
Exemplar Investment Grade Fund	-	n/a
Exemplar Tactical Corporate Bond Fund	-	n/a

9. TAXATION

The Funds qualify as mutual fund trusts under the Income Tax Act (Canada) ("Tax Act"). All of the Funds' net income for tax purposes and sufficient net capital gains realized in any year are required to be distributed to unitholders such that no income tax is payable by the Funds. As a result, the Funds do not record income taxes. Since the Funds do not record income taxes, the tax benefit of capital and non-capital losses would not be reflected in the statements of financial position as a deferred income tax asset.

	Non-Capital Loss* (\$)	Capital Loss** (\$)
Exemplar Leaders Fund	94,035	-
Exemplar Yield Fund	-	54,049
Exemplar Performance Fund	130,577	9,124
Exemplar Investment Grade Fund	23,569	6,910
Exemplar Tactical Corporate Bond Fund	74,207	-

* Non-capital losses can be offset against income in future years for up to 20 years.

** Net Capital losses can be carried forward indefinitely for offset against gains in future periods.

10. INCREASE (DECREASE) IN NET ASSETS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE UNITS PER UNIT

The increase (decrease) in net assets attributable to holders of redeemable units per unit for the years/periods ended December 31, 2014 and 2013 is calculated as follows:

December 31, 2014

	Increase (decrease) in net assets attributable to holders of redeemable units (\$)	Weighted average redeemable units outstanding during the period	Increase (decrease) in net assets attributable to holders of redeemable units per unit (\$)
Exemplar Leaders Fund – Series A	656,204	682,585	0.96
Exemplar Leaders Fund – Series F	259,474	193,145	1.34

Exemplar Yield Fund – Series I	316,515	206,335	1.53
Exemplar Yield Fund – Series L	34,602	31,212	1.11

11. TRANSITION TO IFRS

The effect of the Exemplar Leaders Fund's and Exemplar Yield Fund's transition to IFRS is summarized in this note as follows:

Transition Elections

The only voluntary exemption adopted by the Funds upon transition was the ability to designate a financial asset or financial liability at fair value through profit and loss upon transition to IFRS. All financial assets designated at FVTPL upon transition (see Note 2) were previously carried at fair value under Canadian GAAP as required by Accounting Guideline 18, *Investment Companies*.

Revaluation of Investments at FVTPL

Under Canadian GAAP, the Funds measured the fair values of their investments in accordance with Section 3855, Financial Instruments - Recognition and Measurement, which required the use of bid prices for long positions and ask prices for short positions, to the extent such prices are available. Under IFRS, the Funds measure the fair values of their investments using the guidance in IFRS 13, Fair Value Measurement (IFRS 13), which requires that if an asset or a liability has a bid price and an ask price, then its fair value is to be based on a price within the bid-ask spread that is most representative of fair value. It also allows the use of mid-market pricing or other pricing conventions that are used by market participants as a practical expedient for fair value measurements within a bid-ask spread.

As a result, upon adoption of IFRS an adjustment was recognized in the change in carrying amount of the Funds' investments. The impact of this adjustment was an increase (decrease) in each Funds' net assets attributable to holders of redeemable units as shown below.

Reconciliation of Equity and Comprehensive Income as Previously Reported Under Canadian GAAP to IFRS**Exemplar Leaders Fund**

Equity	December 31, 2013	January 1, 2013
Equity as reported under Canadian GAAP	\$32,708,573	\$24,603,900
Revaluation of investments at FVTPL	116,673	111,345
Net assets attributable to holders of redeemable units	\$32,825,246	\$24,715,245

Comprehensive income	For the year ended December 31, 2013
Comprehensive income as reported under Canadian GAAP	\$7,182,280
Revaluation of investments at FVTPL	5,328
Increase (decrease) in net assets attributable to holders of redeemable units	\$7,187,608

Exemplar Yield Fund

Equity	December 31, 2013	January 1, 2013
Equity as reported under Canadian GAAP	\$10,236,482	\$8,210,845
Revaluation of investments at FVTPL	17,208	16,029
Net assets attributable to holders of redeemable units	\$10,253,690	\$8,226,874

Comprehensive income	For the year ended December 31, 2013
Comprehensive income as reported under Canadian GAAP	\$1,070,939
Revaluation of investments at FVTPL	1,179
Increase (decrease) in net assets attributable to holders of redeemable units	\$1,072,118

Classification of redeemable units issued by the Funds

Under Canadian GAAP, the Funds accounted for their redeemable units as equity. The features of each Fund's redeemable units are not identical and consequently the units do not meet the conditions to be classified as equity. As a result, each Fund's obligations for net assets attributable to holders of redeemable units are financial liabilities under IFRS, presented at the redemption amounts.

Statement of cash flows

Under Canadian GAAP, the Funds were exempt from providing a Statement of Cash Flows. IAS 1 requires that a Statement of Cash Flows to be presented as part of a complete set of financial statements. As such, the Funds have presented a Statement of Cash Flows in the financial statements for the years ended December 31, 2014 and 2013.

12. FUTURE ACCOUNTING CHANGES

IFRS 9, Financial Instruments

The final version of IFRS 9, Financial Instruments, was issued by the International Accounting Standards Board ("IASB") in July 2014 and will replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 introduces a model for classification and measurement, a single, forward-looking 'expected loss' impairment model and a substantially reformed approach to hedge accounting. The new single, principle based approach for determining the classification of financial assets is driven by cash flow characteristics and the business model in which an asset is held. The new model also results in a single impairment model being applied to all financial instruments, which will require more timely recognition of expected credit losses. It also includes changes in respect of own credit risk in measuring liabilities elected to be measured at fair value, so that gains caused by the deterioration of an entity's own credit risk on such liabilities are no longer recognized in profit or loss. IFRS 9 is effective for annual periods beginning on or after January 1, 2018, however is available for early adoption. In addition, the own credit changes can be early applied in isolation without otherwise changing the accounting for financial instruments. The Funds are in the process of assessing the impact of IFRS 9 and have not yet determined when they will adopt the new standard.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

March 31, 2015

TO THE UNITHOLDERS AND TRUSTEE OF EXEMPLAR LEADERS FUND, EXEMPLAR YIELD FUND, EXEMPLAR PERFORMANCE FUND, EXEMPLAR INVESTMENT GRADE FUND, AND EXEMPLAR TACTICAL CORPORATE BOND FUND (COLLECTIVELY THE "FUNDS")

The accompanying financial statements have been prepared by Arrow Capital Management Inc. ("Arrow" or the "Manager" of the Funds), and approved by the Board of Directors of the Manager. The Manager is responsible for the information and representations contained in these financial statements.

The Manager maintains appropriate processes to ensure that reliable financial information is produced. The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and include certain amounts that are based on estimates and judgments. The significant accounting policies which management believes are appropriate for the Funds are described in Note 2 to the financial statements.

Prior to December 2, 2013, the manager of the Funds was BluMont Capital Corporation ("BluMont"). On December 2, 2013, Arrow acquired all the outstanding shares of BluMont, resulting in a change of control of BluMont. On April 1, 2014, Arrow and BluMont amalgamated, continuing under the name "Arrow Capital Management Inc.". At a special meeting of unitholders on November 27, 2013, the unitholders of the Funds approved a change of manager from BluMont to Arrow.

PricewaterhouseCoopers LLP is the external auditor of the Funds, appointed by the unitholders. They have audited the financial statements in accordance with Canadian generally accepted auditing standards to enable them to express to the unitholders their opinion on the financial statements. Their report is set out on the following page.

"James L. McGovern"

Independent Auditor's Report

To the Unitholders of Exemplar Leaders Fund, Exemplar Yield Fund, Exemplar Performance Fund, Exemplar Investment Grade Fund, and Exemplar Tactical Corporate Bond Fund

We have audited the accompanying financial statements of each of the Funds, which comprise the statements of financial position, comprehensive income, changes in net assets attributable to holders of redeemable units and cash flows as at and for the periods indicated in note 1, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements of each of the Funds in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on the financial statements of each of the Funds based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in each of our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements of each of the Funds present fairly, in all material respects, the financial position, financial performance and cash flows of each of the Funds as at and for the periods indicated in note 1 in accordance with International Financial Reporting Standards.
