Investment Process

The Fund will tend to follow a concentrated investment approach where selected core holdings and industry sectors may be overweighted because the manager has particular conviction and or specialized expertise. Investments are made primarily in mid-to-large cap companies believed to be trading at a discount to their intrinsic value and that have sustainable competitive advantages. Geographic and sector allocations may vary significantly over time.

Investor Profile

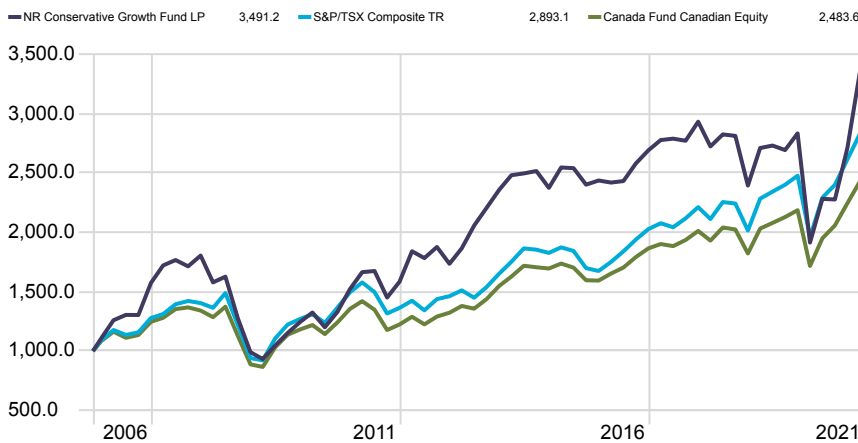

Sophisticated investors who are looking for long-term capital appreciation through a concentrated portfolio strategy with moderate to high volatility.
