

WAVEFRONT GLOBAL DIVERSIFIED INVESTMENT CLASS ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2021

This semi-annual Management Report of Fund Performance contains financial highlights but does not contain the complete semi-annual financial statements for WaveFront Global Diversified Investment Class (the "Fund"). You may obtain a copy of the semi-annual financial statements, at no cost, by calling 877.327.6048, by writing to us at Arrow Capital Management Inc. (the "Manager" or "Arrow"), 36 Toronto Street, Suite 750, Toronto, Ontario M5C 2C5 or by visiting our website at www.arrow-capital.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the Fund's semi-annual financial reports, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

Forward-Looking Information

This Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Fund. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Fund believes it has a reasonable basis for making the forecasts or projections included in this Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward-looking information is not exhaustive, and reference should be made to the other risks discussed in the Fund's filings with Canadian securities regulatory authorities. The forward-looking information is given as of the date of this Management Report of Fund Performance, and the Fund undertakes no obligation to publicly update or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion on Fund Performance

Investment Objective and Strategies

The investment objective of the Fund is to seek superior long-term absolute and risk-adjusted returns with the potential for low correlation to global equity and fixed-income market returns through the selection and management of long and short positions in a globally diversified portfolio of futures, options, forward contracts and other financial derivative instruments on agricultural and soft commodities, metals, energies, currencies, interest rates and equity indices.

The Fund will use leverage. The leverage will be created through the use of cash borrowings, short sales and derivative contracts. The fund's leverage shall not exceed the limits on the use of leverage described in the "Investment Strategies" section in the simplified prospectus or as otherwise permitted under applicable securities legislation.

The core investment strategy of WaveFront Global Asset Management Corp. ("WFGAM"), the sub-advisor, is based on a risk budgeting strategy of allocating capital to markets and utilizing that capital based on the amount of risk premium being priced into markets. WFGAM utilizes a fixed risk budget that targets long-term average annualized downside deviation of less than 13%. Downside deviation is a risk measure that focuses on returns that fall below a minimum acceptable return. This risk budget is then equally allocated across over 60 markets, adjusted by their volatilities and correlations. As a result of this allocation methodology, generally 50% of the portfolio risk budget is allocated to globally-traded industrial and agricultural commodity futures markets, and 50% is allocated to global currency, treasury debt and equity index futures markets.

The degree to which a market's allocated risk budget is utilized is then determined by the net position of multiple trading strategies or algorithms that sample market prices in order to capture persistent risk premiums and changes in risk premiums over time. Unutilized risk budgets that result from conflicting underlying signals are not re-allocated to other markets but go to cash. In addition to the core investment strategy, the investment advisor may utilize trading strategies based on other persistent anomalies or structural biases identified in market data.

The Fund may hold cash or invest in short term securities for the purpose of preserving capital and/or maintaining liquidity, based upon the investment advisor's ongoing evaluation of current and anticipated economic and market conditions.

The Fund is an alternative mutual fund whereby the specific strategies that differentiate this Fund from conventional mutual funds include: increased use of derivatives for hedging and non-hedging purposes, increased ability to sell securities short, and the ability to borrow cash to use for investment purposes.

Investment Risk

The risks of investing in the Fund remain as stated in the Fund's simplified prospectus. There were no material changes to the Fund over the period that affected the overall level or risk.

The Fund is suitable for investors who seek medium to long-term growth through a diversified portfolio of futures, options, forward contracts and financial derivatives. To invest in this Fund, investors should be able to accept a medium degree of risk.

Leverage

Leverage occurs when the Fund borrows money or securities, or uses derivatives, to generate investment exposure to underlying assets that is greater than the amount invested. It is an investment technique that can magnify gains and losses. Leverage may increase volatility, may impair the Fund's liquidity and may cause the Fund to liquidate positions at unfavorable times. The Fund has received exemptive relief from the regulators whereby the Fund will be permitted to have aggregate exposure to specified derivative transactions which includes the following restrictions:

- the notional leverage of the Fund, excluding futures on government securities and Euro dollars, is generally between 0% and 300% and can never go above 500%;
- the notional leverage of the Fund, including futures on government securities and Euro dollars is typically around 300% but from time to time may be as high as 1000%.

Notional leverage does not reflect the impact of put or call options which hedge futures positions as noted above. In the case of government securities and Euro dollars, futures positions are restricted to those that are based on investment grade government securities and Euro dollars.

The Fund may borrow cash up to a maximum of 50% of its NAV and may sell securities short, whereby the aggregate market value of securities sold short will be limited to 100% of its NAV. The combined use of short-selling and cash borrowing by the Fund is subject to an overall limit of 100% of its NAV.

During the period from January 1, 2021 to June 30, 2021, the Fund's aggregate amount of notional leverage, excluding futures on government securities and Euro dollars, ranged from 124% to 422% (2% to 319% in December 31, 2020) of the Fund's NAV during such period of time.

Results of Operations

The net asset value ("NAV") of the Fund increased from \$14.8 million to \$15.5 million from December 31, 2020 to June 30, 2021. The Fund had net redemption of \$1.3 million for the period. The Fund paid no distributions while the portfolio's performance increased assets by \$2.0 million. For the period ended June 30, 2021, Series F Shares of the Fund delivered a gain of 14.3% (gain of 18.3% in the period ended June 30, 2020). Its benchmark, the Societe Generale CTA Index, posted a gain of 6.5% over the same period (loss of 2.7% in the period ended June 30, 2020). Please refer to the Past Performance section for the performance of the other series. The performance of the other series offered by the Fund differs from Series F due largely to varying level of expenses charged to each series, as explained in the Management Fees section.

The Fund seeks to profit from trend, carry, and deep value risk premia observable in exchange listed futures and options on futures globally. The Fund adapts to incoming data and adjusts positions according to its fully systematic model, but does not attempt to forecast or predict future prices. The Fund continues to maintain its focus on true diversification.

Positive returns in the first half of the year were driven by long positions in agricultural commodities, energies, and to a lesser extent, long equities, with inflation concerns becoming the primary driver of the economic news cycle. The Fund transitioned into predominantly long positions in all sectors, except for short positions in fixed-income, some industrial metals, sugar and cocoa.

The Fund will always be focused on true diversification and having a negative correlation to stocks during periods of significant market stress.

Recent Developments

(BASED ON INFORMATION AS AT JULY 23, 2021)

The global economy continues to face uncertainty over the ultimate impact Quantitative Easing programs. The paradigm shifts in global markets we are observing now is inflationary, with US Core CPI rising to +4.5% in last week's release from the Bureau of Labor Statistics. While most market pundits are describing the current spike in CPI in terms of 'transitory' effects of the COVID-19 recovery, a preponderance of evidence suggests that we are experiencing a dramatic increase in the number of sporadic price spikes due to **persistent** inflationary pressures. The Fund is well positioned to profit from a continuation of the inflationary environment we are in; however, the Fund could also perform well with the resurgence of deflation. Temporary deflation could result from any number of unanticipated bearish forces, not limited to vaccine hesitancy and the spread of the Delta variant (which would be very unfortunate, but might offer a temporary reprieve from inflation fears).

Other Developments

Amendments to National Instrument 81-102 - *Investment Funds* ("NI-81-102") that became effective January 3, 2019 ("**Alternative Mutual Fund Amendments**") established alternative mutual funds and repealed large sections of National Instrument 81-104 *Commodity Pools* ("NI 81-104"). With the Alternative Mutual Fund Amendments, the Fund became an alternative mutual fund which permits the Fund to use strategies generally prohibited to conventional mutual funds, such as the ability to invest more than 10% of its NAV in securities of a single issuer, the ability to invest in physical commodities or specified derivatives, to borrow cash, to short sell beyond the limits prescribed for conventional mutual funds and to generally employ leverage. Former NI 81-104 had permitted mutual funds that were commodity pools (such as the Fund) to be exempt

from certain investment restrictions in NI 81-102. With the Alternative Mutual Fund Amendments, the Fund can no longer rely on these exemptions. The Fund has received exemptive relief whereby the Fund will be permitted to have aggregate exposure to specified derivative transactions as previously permitted under Former NI 81-104. Effective June 18, 2019, the fund was renamed to WaveFront Global Diversified Investment Class.

Related Party Transactions

Arrow Capital Management Inc. is the Manager and Portfolio Advisor of the Fund. The Manager, in consideration for management fees and performance fees, provides management services required in the day-to-day operations of the Fund. The Fund also reimburses the Manager for any operating or administrative expenses the Manager pays on behalf of the Fund. For the period ended June 30, 2021, the Manager has, in its discretion, agreed to absorb \$31,661 (\$46,227 in June 30, 2020) of operating expenses associated with the Fund.

Management Fees

The table below outlines the Fund's annual Management Fee rate. It also states the percentage of the total management fees that were used to pay trailer commissions. The remainder of the management fees were used to pay for investment management services and sub-advisory fees to WFGAM.

	Series A Shares	Series F Shares	Series I Shares/ Series R Shares	Series L Shares
Management Fees <i>(Annual Rate %)</i>	2.00%	1.00%	Negotiable	2.30%
Trailer Fees <i>(rate as % of Management Fees)</i>	44.7%	-	-	38.5%

In addition, the Fund pays Arrow performance fees ("Performance Fees") equal to 20% of the amount by which the Fund return in a year is in excess of the high water mark (the "High Water Mark"), and no Performance Fee is payable unless an annual hurdle rate of 6% is achieved in that year. 100% of the Performance Fees are used to pay for investment management and sub-advisory services. Please refer to the Fund's simplified prospectus for further details relating to Performance Fees.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help the reader understand the Fund's historical financial performance for the past five years. This information is derived from the Fund's financial statements and is represented net of expenses which have been charged to the Fund.

**Ratios have been annualized.*

1. The net assets per share shown are referenced to net assets attributable to holders of redeemable shares determined in accordance with International Financial Reporting Standards ("IFRS") and are derived from the Fund's financial statements. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per share.
2. Distributions, if applicable, were reinvested in additional shares of the Fund at the discretion of the underlying shareholders.
3. The Manager may absorb certain expenses or waive certain fees otherwise payable by the Fund. The amount of expenses absorbed or waived (if applicable) is determined annually at the discretion of the Manager and the Manager can terminate the absorption or waiver at any time.
4. Management expense ratio ("MER") is calculated as total expenses net of waived fees, if applicable, and excludes certain taxes, commissions and other fund transaction costs for the stated year expressed as an annualized percentage of daily average NAV during the stated year. The management expense ratio is calculated in accordance with Part 15 of NI 81-106. Management expense ratio before performance fee is the MER before any performance fees, if applicable, for the stated year.
5. Management expense ratio before waivers or absorptions is the MER inclusive of performance fees before any waivers or absorptions are deducted.
6. The Fund's portfolio turnover rate can indicate how actively the investment advisor manages the portfolio of investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of its securities in its portfolio once in the course of the year. The higher the fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.
7. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the period.
8. Ratios and supplemental data, where applicable, are computed using the NAV of the Fund.

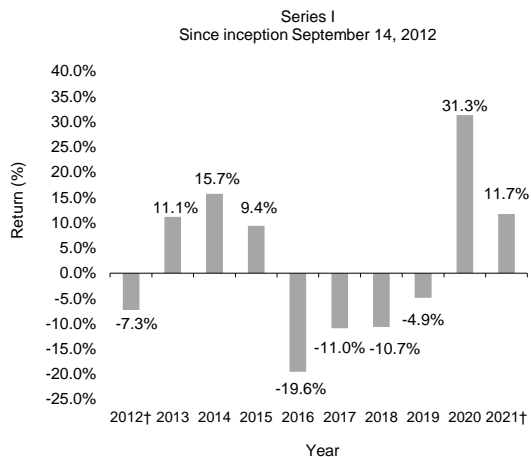

Past Performance

The performance information shown below assumes that all distributions, if any, made by the Fund in the years shown were reinvested in additional shares of the Fund. If you hold the Fund outside a registered plan, you will be taxed on distributions. Distributions of income the Fund earns and capital gains it realizes are taxable in the year received whether received in cash or reinvested in additional shares. No adjustment for potential tax consequences to an investor has been made to the performance information.

The indicated rates of return are historical annual compounded total returns including changes in share value and do not take into account sale, redemption, distribution or other optional charges, that, if applicable, would have reduced returns or performance. An investment in the Fund is not guaranteed. Its value changes frequently and how the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates the Fund's annual performance for each year shown and indicates how the Fund's performance has changed from year to year. It shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of the year.

†Returns shown represent a partial year.

Annual Compound Returns (Compound Performance)

The following table shows the annual compound total returns of the Fund, and for its benchmark, the Societe Generale CTA Index (the Societe Generale CTA Index is an equal weighted, daily calculated annually re-balanced, return index for a pool of CTAs selected from the larger managers that are open to new investment) for the period ended June 30, 2021. The Relative Performance returns show the performance of the Fund as compared to the benchmark.

	1 Year	3 Years	5 Years	10 Years	Annualized Since Inception
Series A	30.6%	11.1%	(3.2%)	(0.6%)	1.1%
Series F	32.3%	12.4%	(2.1%)	0.3%	2.1%
Series I	26.1%	11.4%	(2.0%)	N/A	2.0%
Series L	30.6%	11.0%	(3.3%)	N/A	(0.3%)
Series R	29.2%	N/A	N/A	N/A	(2.5%)
Societe Generale CTA Index	12.9%	4.9%	1.0%	2.1%	2.0%

Summary of Investment Fund as at June 30, 2021

The summary of investment Fund below includes information regarding the Fund as a whole. This summary may change due to ongoing portfolio transactions of the Fund and a quarterly update is available by contacting Arrow at 877.327.6048 or by visiting Arrow's website at www.arrow-capital.com.
